Automobile travel is a basic, pervasive, and often necessary mode of transportation to and from one’s home, workplace, and leisure activities. Many people spend more hours each day traveling in cars than walking on the streets. Undoubtedly, many find a greater sense of security and privacy in traveling in an automobile than they do in exposing themselves by pedestrian or other modes of travel.

_The right to be secure against searches and seizures is one of the most difficult to protect. Since the officers are themselves the chief invaders, there is no enforcement outside of court. … We must remember that the extent of any privilege of search and seizure without warrant which we sustain, the officers interpret and apply themselves and will push to the limit._

All in all, the case should be reversed for purposes of justice, for the man apparently is guilty and no one seems to deny that.

Harry Blackmun, Internal Memorandum on _Cardwell v. Lewis_ (No. 72-1603) page 3. Harry Blackmun Papers, Manuscript Division, Library of Congress, Box 182, Folder 9
Police officers have always kept a close watch on the actions and movements of motorists. As a result, motorists’ liberty to travel without government disturbance and the state’s power to investigate criminality have shared an uneasy co-existence. For example, at the start of the twentieth century, certain sectors of society saw the automobile as a place for illicit behavior. A lawyer for the American Social Hygiene Association stated that “the automobile prostitute . . . is the bane of law enforcement officials. … Few city police departments, or country sheriffs … are sufficiently equipped with motorcycle police to patrol the city streets and country roads, and the prostitute may indefinitely vary the scene of her operations, or the car itself may be used if necessary.”¹ On another occasion, a juvenile judge asserted that “the automobile has become a house on prostitution on wheels.”² The convenience and efficiency of automobile travel, as contrasted with travel by train, made

¹ David J. Langum, Crossing over the Line: Legislating Morality and the Mann Act 131 (1994).
² Id. See also, Jessica R. Pliley, Policing Sexuality: The Mann Act and the Making of the FBI 137 (2014) (noting that “nothing would exemplify the connections between consumer culture, youth culture, sex and immorality more than that great emblem of American ingenuity, economic power, and consumerism – the automobile.”).
enforcement of the 1910 Mann Act, which criminalized transporting women across state lines for prostitution “or any other immoral purpose,” more difficult for federal agents.3

Just as automobiles made investigating Mann Act offenses more arduous, a decade later, cars made enforcing the Eighteenth Amendment’s nationwide ban on alcohol more complicated for law enforcement generally. During Prohibition, police officers not only scrutinized bootleggers, but also directed their investigations “to people not used to being policed.”4 In other words, Americans from all walks of life were subject to police surveillance, intrusive seizures and expansive searches, which had previously been directed at the so-called criminal-element of society.5 It did not help relations between police and the citizenry that automobiles were seized and subject to invasive searches based on flimsy grounds and sometimes the methods employed by the

3 Pliley, supra note ___ at 137 (“Because of the privacy and independence afforded by cars, Bureau agents often had more difficulty tracking suspects, retracing the journeys to interview witnesses, and determining exactly what had happened in the car.”).
police were random and violent. Indeed, because enforcement of the Eighteenth Amendment often required police to undertake actions that violated the Fourth Amendment’s guarantee against unreasonable searches and seizures, one legal commentator urged the Supreme Court to “recognize frankly that the 4th Amendment is inconsistent with the 18th” and “that the 4th Amendment has actually been repealed, where enforcement of the Volstead Act is concerned.”

In modern times, some police officers have been forthright about their reasons for stopping and investigating certain motorists:

A patrolman ran a warrant check on a car with a broken taillight and four young blacks in it. He found the car had a warrant, and stopped the car and checked the driver for warrants. The driver was

---

6 See generally, Wesley M. Oliver, The Prohibition Era and Policing 39 (2018) (noting that the “new effort at vice regulation led to indiscriminate searches that eroded the trust the public had in the police. Prohibition created enormous opportunities for corrupt officers, and liquor searches by honest officers involved intrusions on privacy, destruction of property, and not infrequent acts of physical violence.”). See also Beverly Gage, America’s Long Hangover, The Nation, April 27, 2016 (“Prohibition itself turned out to be a law enforcement extravaganza, in which the police, politicians, and judges had to figure out how to force people to obey a law that they didn’t much like. In the end, most Americans concluded that highly policing, a massive administrative apparatus, and a hefty tax burden were too high a price to pay for slightly healthier livers and supposedly cleaner, more godly behavior.”).

7 Frederic A. Johnson, “Some Constitutional Aspects of Prohibition Enforcement,” 97 Central Law Journal 114, 122-123 (1924). This view did not go unchallenged. See Thomas E. Atkinson, Prohibition and the Doctrine of the Weeks Case, 23 Mich. L. Rev. 748, 749-50 (1925) (noting that “the Eighteenth Amendment is merely an enlargement of the federal power to deal with liguor offenses and was never intended to alter in any way the constitutional safeguards and personal guarantees”).

4
not wanted, and the patrolman did not cite him for the rear taillight because, as he put it, the man had the “right attitude.” Later the patrolman said he investigated the car in the first place because there blacks in it, and with blacks “there is always a greater chance of something wrong.”

In December 1986, Sheriff Harry Lee of Jefferson Parish, Louisiana announced that his deputies would routinely stop black motorists driving in white neighborhoods: The Sheriff stated his deputies would:

[S]top everybody that we think has no business in the neighborhood. It’s obvious that two young blacks driving a rinky-dink car in a predominately white-neighborhood – I’m not talking about on the main thoroughfare, but if they’re on one of the side streets and they’re cruising around – they’ll be stopped.

A North Carolina State Trooper, C.J. Carroll, told [a defense lawyer] he patrols those two areas of Durham “for the purpose of looking for Hispanic males.” [The defense lawyer] further inquired, if all her client had done was exit the store with a carton of beer, why did Trooper Carroll stop him. Trooper Carroll responded: “Everyone knows that a Hispanic male buying liquor on a Friday or a Saturday night is probably already drunk”; “Mexicans drink a lot because they grew up where the water isn't good”; and that he did not care what happened in court “as long as I get them [(i.e. Hispanic males)] off the road and in jail for one night.” Finally, when asked if he targets Hispanics, Trooper Carroll

---

stated: “I'm not targeting Hispanics. Most of my tickets go to blacks.”

Under our constitutional system, the Supreme Court is in-charge of protecting motorists from unreasonable searches and seizures. The Court, however, has been consistently bad in defending the Fourth Amendment rights of motorists. To be sure, the Court has issued opinions where individuals have prevailed against the government in “car” cases. But for almost a century, the Court has steadily rejected Fourth Amendment claims pressed by individuals in cases involving automobiles. Often in explaining its rulings, the Court claims that car cases are different from other search and seizure issues. But a close

---

10 State v. Juan Villeda, 599 S.E. 2d 62, ___ (N.C. Ct. of Apps., July 20, 2004). Thanks to Professor Gabriel Chin for alerting me to this case.
12 See, e.g. Cady v. Dombrowski, 413 U.S. 433, 442 (1973) (stating that cars are different from houses not only due to their mobility, but also because of “the extensive, and often noncriminal contact with automobiles that will bring local officials in ‘plain view’ of evidence, fruits, or instrumentalities of a crime, or contraband”) Arizona v. Gant, 556 U.S. 332, ___ (2009) (explaining that the second-prong of its holding – that police may search the interior of a car incident to arrest “when it is ‘reasonable to believe evidence relevant to the crime of arrest might be found in the vehicle’” – is attributable to “circumstances unique to the vehicle context”). Tellingly, Gant “deemed it unnecessary to state or even hint at what these unique
analysis of the Court’s reasoning discloses that something else motivates the Justices’ results. In fact, the Court’s logic in car cases is often based on fictitious claims about motorists’ privacy interests, intellectually dishonest reasoning and a candid desire to expand the discretion and power of law enforcement officers to stop and search motorists. Along the way, the Court’s has permitted law enforcement officers to stop and interrogate motorists based on their Mexican ancestry near the southern border,13 and most unfortunately, turned a blind-eye to pretextual traffic stops targeting black and Hispanic drivers for suspicionless criminal investigations.14

Sarah Seo’s new book, Policing the Open Road: How Cars Transformed American Freedom, vividly and expertly describes America’s history of “policing cars … as it fast became an automotive society.”15 Professor Seo’s book outlines the “practical, theoretical, and

______________________

circumstances are” that made cars different for search incident to arrest purposes. 3 Wayne R. LaFave, Search and Seizure: A Treatise on the Fourth Amendment, §7.1(d), 719 (5th ed. 2012).
15 Seo, supra note ___, at 8.
legal problems of policing everybody who drove.”\textsuperscript{16} Because of the eventual ubiquity of cars and the pervasive regulation of motorists, police were afforded “discretion to administer the massive traffic enforcement regime and deal with the sensitivities of ‘law-abiding’ citizens who kept violating traffic laws.”\textsuperscript{17} Discretionary police power “profoundly altered what it meant to live free from state intrusion in the Automotive Age.”\textsuperscript{18} Seo’s book illuminates the nexus between this history of policing cars and “the history of American criminal justice and its troubled present.”\textsuperscript{19}

More specifically, \textit{Policing the Open Road} is required reading for “[F]ourth [A]mendment buff[s].”\textsuperscript{20} Judges, lawyers, law professors and their students interested in understanding the history of American search and seizure law should read this book. Seo’s hypothesis is direct: “Examining the spate of car cases in state and federal courts that began

\textsuperscript{16} Id.
\textsuperscript{17} Seo at 8.
\textsuperscript{18} Id.
\textsuperscript{19} Id.
in the 1920s and persisted throughout the century reveals a startling
devolution: Fourth Amendment jurisprudence evolved not just to limit
police discretion, as we have learned, but also to accommodate it.”\textsuperscript{21} Of
course, her thesis is at odds with the traditional descriptions of the
Supreme Court’s search and seizure doctrine. Under the standard
interpretations, the Warren Court, starting in the early 1960s,
commenced the “due process revolution,”\textsuperscript{22} which was designed to
protect the constitutional rights of criminal suspects. Seo’s book proffers
an alternative account: “[I]n fact, American courts did more to
encourage and sustain, rather than to check, the police’s growing
power.”\textsuperscript{23} Without questioning the significance and correctness of the
Warren Court’s renowned cases, such as \textit{Mapp v. Ohio},\textsuperscript{24} Seo contends
that “[o]nce we examine the celebrated decisions alongside the
underbelly of criminal procedure – the thousands of car cases that

\begin{itemize}
\item \textsuperscript{21} Seo at 17.
\item \textsuperscript{22} Fred P. Graham, The Self-Inflicted Wound 28 (1970).

\item \textsuperscript{24} 367 U.S. 643 (1961).
\end{itemize}
justified police action – the judicial endorsement of greater discretionary policing becomes undeniable.”

According to Seo, judicial approval of police discretionary power to investigate motorists was no accident. As in other Fourth Amendment contexts, the critical issue was whether police would need a judicial warrant to seize or search a vehicle. After the Court’s 1925 landmark ruling in *Carroll v. United States* effectively eliminated the need for police to seek judicial authorization before searching or seizing automobiles, as they must do before entering homes or seizing personal papers, judges deferred to the police when defendants challenged searches or seizures of their cars. “When faced with the exigencies of automobility – and especially when those caught red-handed, not the wrongly suspected, were typically the one who brought Fourth Amendment challenges – judges tended to side with order and security

---

25 Seo at 18.
26 Id. at 16 (“At stake in this legal question was the very legitimacy of discretion at the heart of police governance. Requiring officers to get a warrant from a magistrate would hold up their efforts to proactively investigate crime. Conversely, eliminating the warrant requirement would allow the police to act according to their own judgement.”).
and conclude that zealous and intrusive police action for the sake of the public welfare was reasonable and did not compromise the values of a democratic society.”  

Rather than protecting motorists, judges interpreted the Fourth Amendment’s text, which, *inter alia*, mandates a right of the people to be free from “unreasonable” searches and seizures, as a tool for investigation.  

As in other Fourth Amendment contexts where judges employ a reasonableness model to decide cases, a reasonableness theory in car cases did not encourage principled judicial results. Judges found it “difficult to pin down a definition of reasonable policing, let alone flesh out a coherent theory for determining reasonableness, when patrolling the byways and highways presented a myriad of unexpected situations and often involved split-second decision-making.”  

Rather than announce “neutral principles,” judges did what judges often do in Fourth Amendment cases; that is, defer to

---

28 Seo at 19.  
29 The Fourth Amendment provides: “The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.” U.S. Const. IV.  
30 Seo at 19  
the police. “[R]easonableness functioned as a deferential standard. This deference, in turn, gave the police even more power.”32

In her Introduction, Professor Seo explains that the reasonableness model utilized by judges to resolve car cases eventually “accumulate[d] into judicial rules, which became more numerous, more specific, and more complex.”33 Fourth Amendment rules for vehicles became a procedural regime “in the sense that they direct how the police should police, unlike substantive rights, which secure the right to be free from government, including police, intrusion.” Seo wonders why “the justices settled on procedural rights [in car cases] to protect individuals from the police, rather than, for example, a substantive privacy right not to have one’s car searched.”34 In the next paragraph, she answers the question: the Court rejected substantive rights (and imposing a warrant requirement for certain searches associated with cars) because

32 Seo at 19. See also id. at 220 (“In the history of twentieth-century criminal procedure, jurists applied the reasonableness standard to empower, not to limit, police discretion.”). Because of the deference judges gave to law enforcement interests in car cases, Seo believes that “[f]rom the perspective of cars, the Due Process Revolution was not much of an overthrow of the existing order.” Id. at 19.
33 Id.
34 Seo at 19-20.
Substantive protection would have limited the “discretionary policing that the ‘law-abiding’ wanted.”\textsuperscript{35} The choice of procedure over substance meant that “minorities and the poor … received rules regulating the police’s ever-growing power.”\textsuperscript{36} The consequence was “not protection of individuals’ privacy in their cars but the empowerment of highway patrollers and traffic cops who could take advantage of the thicket of procedures to exercise their power in discretionary, even discriminatory, ways.”\textsuperscript{37} In the end, motorists were subject to discretionary policing and everyone lost some of their freedom.

\textit{Policing the Open Road} offers insights and astute analysis on many of the Court’s important Fourth Amendment car cases. Space constraints preclude me from commenting on all of the cases and topics Seo probes. I focus on Professor Seo’s analysis of \textit{Carroll v. United States} and \textit{Brinegar v. United States}.

\textsuperscript{38} \textit{Carroll} is important not only

\begin{thebibliography}{99}
\bibitem{note35} Id. at 20.
\bibitem{note36} Id.
\bibitem{note37} Seo at 20.
\bibitem{note38} 338 U.S. 160 (1949).
\end{thebibliography}
because it was the Court’s first car case. Understanding Carroll (and Brinegar, which solidified and expanded Carroll’s holding) is essential because, nearly one hundred years later, its logic continues to direct how the modern Court resolves Fourth Amendment claims of motorists.39 Put simply, a majority of today’s Justices view the Fourth Amendment rights of motorists essentially the same way that a majority of the Justices did in 1925. Specifically, Part I highlights Seo’s major assertions regarding Carroll; Carroll’s influence on another controversial search and seizure decision, Terry v. Ohio,40 which upheld an officer’s power to stop and frisk a person he suspects is armed and dangerous; and finally, Carroll’s connection to the police authority upheld by the Justices that permits the discretionary and discriminatory policing that currently pervades America’s highways and roads.

Part II of this essay focuses on the modern Court’s understanding of motorists’ privacy. Carroll’s vision of how the Fourth Amendment

40 392 U.S. 1 (1968).
applies to searching cars was not inescapable. While many lawyers and law students today might not believe it, not so long ago several members of the Burger Court took the view that cars should be treated like other effects under the Fourth Amendment – which meant the warrant requirement would apply to cars. Though a majority of Justices never embraced the view that warrants are required to search the interior of vehicles, in a series of cases the Court went back and forth on whether warrants were needed to search private containers found in vehicles. Part II examines these cases and the Court’s flawed norm that motorists have diminished privacy interests in closed containers found in cars when police have probable cause to search. Remarkably, the modern Court has embraced a narrower view of motorists’ privacy rights than the view announced in Carroll. More importantly, the understanding that currently permits warrantless searches of suitcases and purses under the automobile exception, if meant to be a neutral principle, would also allow warrantless searches of computers and cell phones found in cars.
Part I. Bad from the Beginning – *Carroll v. United States*

Professor Seo begins her analysis of the automobile’s impact on Fourth Amendment doctrine at the right place: *Carroll v. United States*. What makes Seo’s book so good is that she provides explorations and insights of *Carroll* not offered in other studies of this seminal ruling. While the facts in *Carroll* are familiar to constitutional criminal procedure professors, law school casebooks typically provide only a passing reference to *Carroll*. There is no discussion of *Carroll* in the casebooks describing it as a controversial ruling, and certainly nothing

---

41 See, e.g., Yale Kamisar, et al., Basic Criminal Procedure 376 (15th ed. 2019). Law students learn that *Carroll* announced the rule that police may search a vehicle found traveling on the road when there is probable cause that the vehicle contains contraband or evidence of criminality and it is impractical to obtain a warrant.

that links *Carroll* to the discretionary and race-based policing of motorists that exists today.

The Eighteenth Amendment’s nationwide ban on “the manufacture, sale, or transportation of intoxicating liquors”\(^{43}\) was highly controversial and deeply divided Americans. The federal government’s efforts at enforcing Prohibition were equally divisive, if not more so.\(^{44}\) “During the 1920s the Supreme Court, under the leadership of Chief Justice William Howard Taft, was at the storm center of prohibition enforcement.”\(^{45}\) The Taft Court was “grimly committed to the success of prohibition.”\(^{46}\) At the same time, the Taft Court accepted Fourth Amendment’s exclusionary rule, which required that evidence obtained by unconstitutional searches and seizures by federal officers not be used in federal criminal trials. The upshot was that “prohibition sparked a

\(^{43}\) U.S. Const. amend. XVIII, *repealed by* U.S. Const. amend. XXI.

\(^{44}\) Post, *supra* note ___ at 11 (“In contrast to the enforcement of state and local prohibition laws that predated prohibition, federal efforts to enforce the Eighteenth Amendment were so conspicuously ineffectual that widespread violation of prohibition became, in [President Warren] Harding’s words, a ‘nation-wide scandal’ that was ‘the most demoralizing factor in our public life.’”) (footnotes omitted).

\(^{45}\) Post, *supra* note ___ at 7.

\(^{46}\) Id. at 42 (footnote omitted).
And the prohibition cases of the Taft Court

reflected a sharp break with earlier decisions interpreting the Fourth Amendment. Most conspicuously, the Court abandoned the rule of liberal construction of the protection afforded by the Fourth Amendment. Instead, it interpreted the amendment to permit a variety of intrusive enforcement actions by prohibition authorities. ... The most obvious result of the Supreme Court decisions was to limit the occasions when enforcement agents had to obtain warrants.48

Put simply, Prohibition enforcement was a game changer for the Fourth Amendment.49

Shortly after the start of Prohibition, federal Prohibition agents and a Michigan law enforcement officer were looking for bootleggers on the road between Detroit and Grand Rapids when an Oldsmobile Roadster

47 Id. at 117 (footnotes omitted).
48 Kenneth M. Murchison, Federal Criminal Law Doctrines: The Forgotten Influence of National Prohibition 68 (1994). Query whether modern law students understand the nexus between the enforcement of Prohibition and the Fourth Amendment rules they learn. See e.g., Hester v. United States, 265 U.S. 57 (1924) (police trespass on a person’s private property to seize liquor in the open fields is a not search under the Fourth Amendment); Carroll v. United States, 267 U.S. 132 (1925) (warrantless search of an automobile based on probable cause constitutional); Olmstead v. United States, 277 U.S. 438 (1928) (wiretapping of Roy Olmstead’s bootlegging operations did not constitute a search or seizure under the Fourth Amendment), overruled by Katz v. United States, 389 U.S. 347 (1967).
drove past. One of the feds, Fred Cronenwett, suspected that George Carroll was in the Roadster. Cronenwett had encountered Carroll and two others, John Kiro and a man named Kruska, a few months earlier during an undercover operation. The three had arrived at the meeting in an Oldsmobile Roadster. Cronenwett proposed to buy whiskey from Carroll. The three left, purportedly to obtain the whiskey, but “in a short time Kruska came back and said they could not get it that night, that the man who had it was not in, but that they would deliver it the next day.”\textsuperscript{50} The sale never occurred.

When Cronenwett again saw the Oldsmobile Roadster on the highway, he suspected that “the Carroll boys” were up to no good.\textsuperscript{51} After stopping the Roadster occupied by Carroll and Kiro, the officers searched the car, but initially found no liquor. “They were about to let the duo go when Cronenwett struck something hard, so hard that it ‘was practically solid,’ in the cushion of the back seat.”\textsuperscript{52} Inside, the officers found sixty-eight bottles of “blended Scotch whiskey” and “Gordon

\textsuperscript{50} 267 U.S. at 135.
\textsuperscript{51} Id. at 160.
\textsuperscript{52} Seo at 114.
gin.”53 Carroll and Kiro were arrested notwithstanding Carroll’s offer to Cronenwet to “Take the liquor and give us one more chance and I will make it right with you.”54

After the defendants were convicted of violating the Volstead Act,55 they appealed to the Court contending that the seizure and search of the Oldsmobile and their subsequent arrest violated the Fourth Amendment. Specifically, the defendants argued that stopping the vehicle constituted a “seizure,” which was the equivalent of an arrest for constitutional purposes and required a judicial warrant based on probable cause of criminality. The common law did allow warrantless arrests if police had probable cause of a felony, or, with a misdemeanor, if police had personally observed a misdemeanor occur which was a breach of the peace. Counsel for the defendants, however, reminded the Court that “one of the agents had testified that they ‘had no reason to

---

53 267 U.S. at 136.
54 Id.
55 The Volstead Act, officially known as the National Prohibition Act, ch. 85, 41 Sta. 305 (1919, repealed by Liquor Law Repeal and Enforcement Act, ch. 740, 49 Stat. 872 (1935), was enacted by Congress to implement the Eighteenth Amendment’s nationwide ban on the manufacture, sale or transportation of intoxicating liquors.
believe that the [defendants] were transporting liquor’ before stopping
and searching the Oldsmobile. And without a lawful seizure or arrest,
the officers could not conduct a warrantless search.’”56

Without disputing the defense’s legal position, the government
urged the Justices to ignore the common law rule of arrest because cars
were different: “The ‘use of such motor vehicles by criminals …
demands that our ancient law be so amended as to cope with these
modern facilities.’”57 The government told the Court that “a lower
standard than even probable cause was necessary when cars were
involved.”58 Counsel for defendants rejoined that if the government’s
position were adopted “searches of vehicles on the highway will if
promiscuously permitted lead to great abuses.”59 Thus, the Justices
confronted a dilemma:

Because cars provided both the getaway and a cover for hiding
things, officers not only had insufficient time to get a warrant but
also usually had only mere suspicion, short of probable cause or

59 Id., quoting Carroll, Petitioners’ Brief at 13.
knowledge, that a car was transporting illicit goods. And because so many people drove and their cars looked, well, standardized, any rule on the police’s authority when applied to the automobile would affect the lawbreaking and the law-abiding alike.\textsuperscript{60}

While the advent of the automobile raised thorny concerns for Fourth Amendment rules, Professor Seo intimates that another dynamic may have been on the minds of the Justices in \textit{Carroll}. Eleven years before \textit{Carroll} was decided, \textit{Weeks v. United States}\textsuperscript{61} ruled that evidence obtained from an illegal search or seizure was inadmissible in federal court. Professor Seo states that the exclusionary mandate announced in \textit{Weeks} “soon proved as divisive as Prohibition itself.”\textsuperscript{62} Indeed, she believes that the issue of “exclusion became synonymous with the substantive matter of outlawing liquor.”\textsuperscript{63} \textit{Carroll} was argued twice. The case first “appeared on the docket for the 1923 term, but the Justices

\footnotesize

\begin{itemize}
\item \textsuperscript{60} Seo at 115-16.
\item \textsuperscript{61} 232 U.S. 383 (1914).
\item \textsuperscript{62} Seo at 120.
\item \textsuperscript{63} Id. at 120 (footnote omitted); see also Atkinson, \textit{supra} note ___ at 749 (stating that “prohibition plus the violent criticism of the legal principles announced in the \textit{Weeks} case has made the doctrine a virtual battle-ground” in state courts); Arthur W. Blakemore, National Prohibition, § 25 at 514 (2d ed. 1925) (noting that “as the federal courts have been bound to follow” \textit{Weeks}, “the state courts have felt free to disregard it”).
\end{itemize}
asked the parties to reargue the case the following year.”  

In their brief on re-argument, the defendants remarked that “they could ‘not believe that this court [was] contemplating overruling the principle announced in *Weeks.’”  

As one legal chronicler of Prohibition recognized before *Carroll* was decided, “one of the most important practical difficulties in the enforcement of prohibition involved the transportation of liquor by vehicle.” There were too many automobiles that looked alike. And if police “cannot stop and search vehicles which they strongly suspect of illegal transportation they cannot stop the traffic at all and the [federal

64 Seo at 123.
65 Seo at 123, quoting *Carroll*, Petitioners’ Brief, 15. Professor Post offers another reason for the re-argument in *Carroll*. According to Post, the Justices had originally voted to affirm the convictions, and Justice McReynolds was assigned the opinion. McReynolds changed his mind (and vote) which “evidently caused the case to be reargued.” Post, *supra* note ____ at 123, n. 406. After re-argument, Taft took over writing the opinion. Id. Professor Post’s research also reveals that the Justices were divided about the result in *Carroll*, and at one point during deliberations a majority of Justices had voted in favor of the defendants. Id. Finally, Post’s examination of Taft’s papers reveals the Chief Justice’s determination to uphold the search and his animosity toward automobiles. Id. (noting that after a majority agreed to affirm the convictions, Taft wrote to his brother: “I am rejoiced because I think it important to establish the correct principle in respect to the search of this instrument of evil the automobile”). See also id. at 125, n. 408 (quoting Taft’s personal correspondence two years before *Carroll* was decided: “the automobile is the greatest instrument for promoting immunity of crimes of violence that I know of in the history of civilization” and “the automobile ... is the greatest instrument to promote immunity from punishment for crime that we have introduced in many, many years, and we haven’t as yet neutralized its effect”).
prohibition] law will be made nugatory.”\textsuperscript{67} Although judges in prohibition cases “seem[ed] to agree that an automobile cannot be searched without cause still many courts are seizing on various elements of suspicion as justifying such searches and holding further that the finding of liquor may be itself a sufficient justification.”\textsuperscript{68} \textit{Carroll} would not embrace this position, but it came close to doing so.

Furthermore, Professor Seo suggests a more nuance dilemma confronted Chief Justice Taft, the author of \textit{Carroll}:

The difficulty of the case for Taft stemmed from the fact that the Eighteenth Amendment was the law of the land. The American people had voted to make it part of the US Constitution. Certainly, the police had to respect constitutional limits on their actions. But citizens had to obey the law as well. On the one hand, the Fourth Amendment was on the line. On the other hand, noncompliance eroded the Eighteenth. Many judges, including Taft, were originally against National Prohibition. But once it was ratified, they believed that the rule of law demanded obedience, which, it quickly became clear, depended on greater police enforcement. At stake was the rule of law. The dilemma was that it cut both ways.\textsuperscript{69}

\textsuperscript{67} Id.
\textsuperscript{68} Id. at 476.
\textsuperscript{69} Seo at 123 (footnote omitted).
Solicitor General James Beck provided Taft with a way to resolve *Carroll* without seemingly having to choose between protecting the Fourth Amendment or enforcing Prohibition.\(^{70}\) The government’s brief “referred *Carroll* as a case not about liquor but about how the automobile had completely transformed American society.”\(^{71}\) Rather than debate the soundness of Prohibition or the importance of the Fourth Amendment, the Court should focus on the car. The government urged the Justices to look beyond the fact that the search of Carroll’s vehicle facilitated enforcement of Prohibition; future cases could involve more violent offenses with criminals fleeing in cars. The advent of the automobile necessitated that the Court rethink “‘the well-settled rules of the common law’ regarding an officer’s authority to search and seize.”\(^{72}\)

---

\(^{70}\) During the 1920s, some lawyers, legal commentators and even a few federal judges were openly questioning the compatibility of Fourth Amendment rights and effective enforcement of the Eighteenth Amendment. See Post, *supra* note ___ at 118-19. For example, in 1924, the Fourth Circuit wrote: “The constitutional expression, ‘unreasonable searches,’ is not fixed and absolute in meaning. The meaning in some degree must change with changing social, economic and legal conditions. The obligation to enforce the Eighteenth Amendment is no less solemn that that to give effect to the Fourth and Fifth Amendments.” Milam v. United States, 296 F. 629, 631 (4th Cir. 1924). More directly, for some, the need to enforce the Eighteenth Amendment meant diminishing the scope and meaning of the Fourth Amendment.

\(^{71}\) Seo at 124

\(^{72}\) Seo at 124 (footnote omitted).
Whether intentional or not, Solicitor General Beck’s strategy fit nicely with Chief Justice Taft’s view that the automobile was an “instrument of evil” that should be “neutralized.”

Ultimately, as Seo explains, *Carroll* made new law. Typically, when the Court issues an opinion granting police additional powers to invade constitutional freedom, the Court will offer platitudes about the importance of the right at stake and warn that it will not tolerate government abuse of the newly granted power. Chief Justice Taft followed that script in *Carroll* when he offered throwaway dicta that “[i]t would be intolerable and unreasonable if a prohibition agent were authorized to stop every automobile on the chance of finding liquor and thus subject all persons lawfully using the highways to the inconvenience and indignity of such search.” And he also stated that “[i]n cases, where the securing of a warrant is reasonably practicable, *it

74 267 U.S. at 153-54. A few lines later, Taft added “those lawfully within the country, entitled to use the public highways, have a right to free passage without interruption or search” unless officers have probable cause that the vehicle contains contraband or illegal merchandise. Id. at 154.
must be used.”75 The latter remark suggested that whether police needed a warrant to search a car “depended on the exigencies of the situation” – in other words, the validity of a car search “turned on whether the officer had enough time” to get a warrant from a magistrate.76

75 267 U.S. at 156 (emphasis added).
76 Seo at 137 (footnote omitted). A few years later, two rulings, also involving prohibition enforcement, suggested that the Court would not take seriously Taft’s admonition that warrants “must be used” when officers may practically obtain them. Husty v. United States, 282 U.S. 694 (1931) upheld a warrantless search of a parked car for alcohol by federal officers on the grounds that the officers “could not know when Husty would come to the car or how soon it would be removed.” Id. at 701. “Even though several officers took part in the search, the Court did not think it was necessary for one of them to secure a warrant while leaving the car under the watchful eye of the others.” Jacob W. Landynski, Search and Seizure and the Supreme Court: A Study in Constitutional Interpretation 91 (1966). Scher v. United States, 305 U.S. 251 (1938) held that where an officer has probable cause to search a car observed driving on the road, “[p]assage of the car into [a private] garage closely followed by the observing officer did not destroy th[e] right” to search. Id. at 255. Scher, written by Justice McReynolds, who dissented in Carroll, offered no discussion on why it was impractical for the officer to obtain a warrant.

By the end of the century, the Burger and Rehnquist Courts stopped pretending that Carroll demanded warrants to search vehicles in the absence of exigent circumstances. Thus, despite purporting to follow “the Carroll doctrine,” see California v. Acevedo, 500 U.S. 565, 579-80 (1991), the modern Court has summarily revoked the notion that a warrant “must be used,” unless an exigency makes it impractical to obtain one. For the Burger Court rulings, see Michigan v. Thomas, 458 U.S. 259, 261 (1982) (the authority to conduct a warrantless search of a car “does not vanish once the car has been immobilized; nor ... depend [on whether the particular facts show] that the car would have been driven away, or that the contents would have been tampered with, during the period required for the police to obtain a warrant”) (footnote omitted); Florida v. Meyers, 466 U.S. 380, 382 (1984) (per curiam) (following Thomas to rule that a warrantless search of a car that had been impounded and immobilized in a secured area was valid when based on probable cause). For the Rehnquist Court rulings, see Maryland v. Dyson, 527 U.S. 465, ___ (1998) (per curiam) (explaining that the ruling below “rests upon an incorrect interpretation of the automobile exception to the Fourth Amendment’s warrant requirement,” which “does not have a separate exigency requirement”) Pennsylvania v. Labron, 518 U.S. 938 (1996) (per curiam) (same).

All of this hand-wringing on whether Carroll mandated warrants is unnecessary because, as Justice Scalia once acknowledged, Carroll was never serious about requiring police to get
After acknowledging the obvious difference a search of a home or other structure, “which a proper official warrant readily may be obtained,” and a search of a ship, wagon or automobile, where it is impractical to obtain a warrant “because the vehicle can be quickly moved out of the locality or jurisdiction in which the warrant must be sought,” the penultimate passage in *Carroll* proclaimed a rule of reasonableness: The constitutional validity of stopping and searching a car turns on whether the officer “shall have reasonable or probable cause for believing that the automobile which he stops and seizes has contraband liquor therein which is being illegal transported.” In support of this rule, Taft suggested that Congress had authorized a warrantless search of a car based on probable cause to enforce the warrants when practical. *California v. Acevedo*, 500 U.S. at 583 (Scalia, J., concurring in the judgment) (“Cases like *United States v. Chadwick*, 433 U.S. 1 (1977), and *Arkansas v. Sanders*, 442 U.S. 753 (1979), have taken the ‘preference for a warrant’ seriously, while cases like *United States v. Ross*, 456 U.S. 798 (1982), and *Carroll v. United States*, 267 U.S. 132 (1925), have not.”).

Several years ago, I wrote “[t]he *Carroll* Court actually endorsed the warrant preference rule, although based on the facts it found that the exigencies of the moment justified an exception.” Tracey Maclin, Justice Thurgood Marshall: Taking the Fourth Amendment Seriously, 77 Cornell L. Rev. 723, 784 (1991). Seo’s analysis convinces me that there is an alternative (and better) interpretation of *Carroll*. See infra notes ___ and accompanying text.

77 *Carroll*, 267 U.S. at 153.
78 267 U.S. at 155-56.
Prohibition Act, but required a judicial warrant to search a dwelling.\textsuperscript{79} That distinction, Taft found, was consistent with the Fourth Amendment because the provision “does not denounce all searches or seizures, but only such as are unreasonable.”\textsuperscript{80}

A careful reading of \textit{Carroll} reveals that the legal rule announced by Chief Justice Taft “went beyond what existing laws permitted.”\textsuperscript{81} When \textit{Carroll} was litigated, the constitutional validity of an arrest turned on whether police had followed common law rules on arrest. Those rules permitted a warrantless arrest only if the suspect had committed a felony, or if the suspect had committed a misdemeanor in the presence of the officer that was a breach of the peace.\textsuperscript{82} “The Volstead Act made

\begin{footnotesize}
\begin{enumerate}

\item Seo at 138.
\item See Horace L. Wilgus, \textit{Arrest Without A Warrant} 22 Mich. L. Rev. 541, 549-50 (1924). Another Prohibition-era treatise, written prior to \textit{Carroll}, described the authority of officers to stop and search cars as follows:

\begin{quote}
There is no Supreme Court decision on the subject. The test to be applied is this: if, under the facts of a case, the officer has a reasonable ground to believe by the evidence of his senses that a crime is being committed in the illegal transportation of intoxicating liquor, and he does believe it, he has a right to arrest both the defendant and the automobile and search them for evidence of a crime.
\end{quote}

William J. McFadden, \textit{The Law of Prohibition} § 172 at 223 (1925) (footnote omitted).

The modern Court has not yet addressed whether the “in the presence” requirement for a valid misdemeanor arrest is a constitutional requirement. Atwater v. City of Lago Vista, 532 U.S. 318, 340 n. 11 (2001) (“We need not, and thus do not, speculate whether the Fourth
\end{enumerate}
\end{footnotesize}
transportation of illegal liquor a misdemeanor, unless the accused had been guilty of two previous violation of the Act, in which case he was guilty of a felony.”83 There was no evidence in Carroll that the officers who arrested the defendants had any reason to believe the defendants were guilty of a felony under the Act. Moreover, those officers had no basis for believing that the defendants were committing a “breach of the peace” in their presence. Thus, under the common law, the seizure of Carroll’s vehicle and the arrest of the defendants was illegal and unconstitutional.84

Rather than follow common law rules, however, Taft ruled the authority to seize and search Carroll’s vehicle turned on “[t]he rule for determining what may be required before a seizure may be made by a competent seizing official,”85 and not on whether the defendants were

83 Post, supra, note ___ at 127 (footnote omitted).
84 See also, Murchison, supra note ___ at 70 (Carroll altered the law because it “allowed officers to make arrests for misdemeanors that did not involve a breach of the peace”); Post, supra note ____ at 132 (noting that in “the absence of congressional authorization, the defendants’ arrest was undoubtedly illegal under common law principles”).
85 267 U.S. at 155.
committing a felony or misdemeanor. More directly, Taft was willing to ignore common law rules for arrest and uphold the seizure if another basis could be found to justify the officers’ intrusion. Taft found such a basis by reading the Volstead Act to permit seizures when an officer “shall have reasonable or probable cause for believing that the automobile which he stops and seizes has contraband liquor therein which is being illegally transported.” But, this was “a very strained reading of the Volstead Act.” The Volstead Act only provided that when an officer:

shall discover any person in the act of transporting in violation of the law, intoxicating liquors in any… automobile…, it shall be his duty to seize any and all intoxicating liquors found therein being transported contrary to law. Whenever intoxicating liquors transport or possessed illegally shall be seized by an officer he shall take possession of the… automobile…, and shall arrest any person in charge thereof.

There is an obvious difference between the expression “shall discover” and the concept of “probable cause to believe,” as noted by Justice

86 267 U.S. at 155-56
87 Post, supra note ___ at 131.
88 Carroll 267 U.S. at 144, quoting …. (emphasis added).
McReynolds dissent. In sum, *Carroll* was “constructed on the premise that the Volstead Act authorized searches and seizures made with probable cause” when in fact the statute provided no such authorization, and that this “statutory authorization did not contravene the Fourth Amendment.”

Furthermore, as Professor Seo explained, “[u]nder the common law for misdemeanors, warrantless arrests required actual knowledge through personal observation, not cause for believing. The difference in adding the phrase ‘for believing’ was the difference between knowledge and suspicion.” By contrast, *Carroll* permitted officers to seize a vehicle if they suspected a misdemeanor was occurring. “And with a suspicion-based seizure of a car and its driver, the same officer could then conduct a warrantless search.” Thus, *Carroll* altered constitutional law principles in at least three ways: it permitted an arrest under

---

89 *Carroll*, 267 U.S. at 166 (McReynolds, J., dissenting) (stating that “the words ‘shall discover… in the act of transporting in violation of the law’ cannot mean, shall have reasonable cause to suspect or believe that such transportation is being carried on. To discover and to suspect are wholly different things.”).

circumstances that did not comply with common law rules of arrest; it eliminated the need for a warrant to search and seize a “traveling ‘effect’”; and it “relaxed the standard from knowledge to belief.”94

*Carroll* nicely proves the old English proverb that “necessity is the mother of invention.” There was no established common law power to detain a person short of probable cause. Cars were making enforcing Prohibition especially difficult.95 “It was nearly impossible for officers to have knowledge of illegal activity, based on personal observation, when evidence was usually hidden inside what were essentially movable containers.”96 So, *Carroll* “created a new category of seizures short of an arrest – the vehicle stop – which solved several law enforcement

---

94 Id. Chief Justice Taft was well aware that he was altering common law principles. In a letter to his son, Taft acknowledged that *Carroll*’s holding created “‘some rather new principle.’” Post, supra note ___ at 123, n.406. And while he was drafting the *Carroll* opinion, Taft told Justice Van Devanter that “I shall try to steer away from the suggestion that we are introducing any new law and new principle of constitutional construction, but are only adapting old principles and applying them to new conditions created by the change in the National policy which the 18th Amendment represents.” Id. As Seo notes, “Taft’s private admissions were closer to the truth that *Carroll* had created an entirely new rule.” Id. (footnote omitted).

95 See, National Commission on Law Observance and Enforcement, Report on the Enforcement of the Prohibition Laws of the United States 40, 68 (January 7, 1931). (concluding that “smuggling by motor trucks and automobiles is well organized and is the main factor in land transportation”).

96 Seo at 138.
challenges.”97 Today, law students are taught that Carroll established the “automobile exception.” Rather than create an “exception” to the warrant requirement, however, Carroll sub silento altered substantive Fourth Amendment law.

Because of the logistics and realities of transporting objects in cars, when police stop suspects under conditions similar to Carroll, they have, at best, a suspicion, rather than knowledge, of criminal conduct. And because the Constitution requires probable cause to issue a judicial warrant, magistrates should not issue warrants under these circumstances.98 I learned from Seo’s analysis that Carroll did not turn on whether police have sufficient time to obtain a warrant or even whether they have probable cause as traditionally understood. “Carroll addressed the lack of both time and legal cause with a lower standard that empowered officers to pull over any car that seemed reasonably

97 Id.
98 Cf. Seo at 138 (because the investigation of bootleggers using automobiles rarely involved “knowledge of illegal activity, based on personal observation,” “Taft did not craft a warrant exception based only on whether an officer had time to get a warrant. He also wanted to enable Prohibition agents to investigate suspicious situations.”).
questionable to them.” Put another way, *Carroll* “constitutionally legitimized police discretion” to stop and search vehicles, while pretending to adhere to the traditional standard of probable cause.101

In addition to creating new law, Chief Justice Taft and the majority in *Carroll* also fell prey to a phenomenon that afflicts modern judges. The reasonableness model embraced by *Carroll* contained a significant degree of what one *Carroll*-era commentator labeled “‘judicial charity.’” As Seo observed, “[w]hether the reasonableness standard would truly serve as a restraint on arbitrary policing depended on how closely courts would scrutinize the police’s actions.”103 *Carroll* proved that judges “did not have to be too attentive.” The “gaping hole” in

the government’s claim that there was a legal basis to stop and search Carroll’s vehicle was the testimony of one of the officers who stated that the officers “‘had no reason to believe that the [defendants] were transporting liquor’ before they searched the Roadster.”¹⁰⁵ Nevertheless, the Carroll found probable cause for the seizure based on the government’s submission that the officers knew the defendants’ identities and their vehicle, that Detroit was a well-known source for introducing liquor into the country,¹⁰⁶ and that the defendants, a few months earlier, had promised to deliver liquor to a federal officer, but failed to do so.¹⁰⁷ “This was, to say the least, a ‘very loose definition of

¹⁰⁵ Seo, supra note ___, at 141. In the Carroll opinion, Chief Justice Taft never directly confronts this claim. Instead, he notes that defendants’ counsel emphasized “the statement made by one of the officers that they were not looking for defendants at the particular time when they appeared.” 267 U.S. at 160. That statement, in Taft’s view, was constitutionally irrelevant. Id.
¹⁰⁶ The problem with the Court taking judicial notice of the fact that “Grand Rapids is about 152 miles from Detroit and that Detroit and its neighborhood along the Detroit River ... is one of the most active centers for introducing illegally into this country spirituous liquors for distribution into the interior,” 267 U.S. at 160, is that this geographic area encompassed “eighteen large cities with a combined population of more than eighteen millions of people within this 136 mile zone adjacent to an ocean or an international boundary.” Forrest Black, A Critique of the Carroll Case, 29 Columbia L. Rev. 1068, 1087 (1929).
¹⁰⁷ 267 U.S. at 160. The majority’s conclusion that probable cause existed for the stop and search prompted the dissent to exclaim: “Has it come about that merely because a man once agreed to deliver whiskey, but did not, he may be arrested whenever thereafter he ventures to drive an automobile on the road to Detroit!” 267 U.S. at 174 (McReynolds, J., dissenting).
“probable cause.”108 Carroll’s willingness to find probable cause on these facts “signaled that courts could and would defer to officers’ claimed need for an investigatory search rather than perform a vigorous, independent review.”109

For Seo, Carroll “heralded the beginning of the problem of police discretion in constitutional criminal procedure.”110 She concedes that discretionary policing was around before Carroll was decided. However, Carroll “marked a turning point”111 because the reasonableness model it embraced required judges to “decide whether an exercise of discretion was reasonable … a bedeviling question that would be litigated time and time again.”112 Under this legal model, not surprisingly, “courts’

108 Post, supra note ___ at 135 (footnote and citations omitted); Murchison, supra note ____ at 70 (stating that Carroll was “willing to find probable cause on extremely thin evidence. ... What was missing was any evidence indicating that the defendants had whiskey at the time they were searched. In short, the evidence would have existed anytime the defendants drove the automobile in the Detriot area”) (footnote omitted); Lerner, supra note ____ at 987 (“The evidence that alcohol was concealed in Carroll’s trunk was, to put it mildly, underwhelming.”).

interpretation of the reasonableness standard would make space for the police’s power to grow.”

A. The Nexus Between *Carroll* and *Terry*

I did not expect to find in a chapter critiquing *Carroll* a discussion of another contentious Court ruling expanding police discretion and search authority – *Terry v. Ohio*, which authorized police to frisk a person for weapons when an officer reasonably suspects that the person is armed and dangerous. Prior to *Terry*, the lawfulness of an officer’s authority to detain or frisk a person without probable cause was uncertain, at best. Professor Seo chronicles that, in 1939, Harvard Law Professor Sam Warner was tasked with the assignment “‘to make a study of the law of arrest to ascertain whether the police did, or could, operate within its limitations and, if not, what changes were necessary to make it both a practical standard of police conduct and a safeguard of personal liberty.’” Three years later, Warner produced a model law, the Uniform Arrest Act, that states could adopt. Warner’s model statute

---

113 Seo at 142.
115 Seo at 143.
rewrote the law of arrests. *Inter alia*, “the act narrowed the definition of arrest by taking out detentions, interrogations, and frisks.”116 Put simply, the Act gave police more authority than then-existing law recognized. Interestingly, Seo explains that Warner cited “just one authority” to support his revamping of common law principles regarding arrest – *Carroll*. Paralleling the logic of the government’s brief in *Carroll* which urged the Court to focus not on liquor, but on how cars were impacting society, Warner read *Carroll* “as a case about the need for the law to adapt to modern society.”117 According to Warner, the relevant question in *Carroll* was “not whether [the Volstead Act] extends the powers of peace officers beyond what they were at the time the Constitution was adopted, but whether the extensions are reasonable. If the constitutional scope of police practices was based not on historic practices but reasonableness in light of contemporary conditions, then the Uniform Arrest Act “should certainly be constitutional,” Warner submitted.118

116 Id. at 147.
117 Seo at 148.
118 Seo at 148.
The connections between *Carroll*, the Uniform Arrest Act and *Terry* are undeniable. Seo convincingly connects the dots:

[Terry] first distinguished a “stop” from an arrest and a “frisk” from a full-blown search, and then applied the standard of reasonableness. Like his predecessor, Chief Justice Warren crafted a rule that split the baby. … Warren like Taft before him, created an intermediate police option just short of arrest. In fact, *Terry* cited *Carroll* in holding that when “a police officer observes unusual conduct which leads him reasonably to conclude” – a phrase that was reminiscent of *Carroll*’s “reasonable or probable cause for believing” – that “criminal activity may be afoot and that the persons with whom he is dealing may be armed and presently dangerous, [the officer may perform a frisk for weapons]. … *Terry* created another category of searches and seizures that did not require the police to have actual knowledge but only “reasonable suspicion.”119

Eventually, *Terry* and it progeny would significantly expand police authority to detain and search persons in myriad contexts where police lacked probable cause to make an arrest or undertake a full-scale search. Indeed, *Terry* is viewed “as a touchstone of modern Fourth Amendment jurisprudence.”120 The expanded police power and discretion afforded

119 Seo at 151.
by Terry was justified in the name “reasonableness.”121 Steering Terry “was the logic of Carroll that the transformations in modern America necessitated a new relationship between citizens and the police.”122

Further, in “an automotive society, case law on policing the public

121 Id. at 823 (discussing Justice Brennan’s letter to Chief Justice Warren, during the deliberations of Terry, wherein Brennan wrote that Terry “was about ‘reasonableness’ of stops and frisks under the Reasonableness Clause of the Fourth Amendment, not about the presence or absence of the probable cause required by its Warrant Clause.” Accordingly:

Brennan explained that because street stops and frisks are not police activities that were, or ever could be, approved by judges in advance – i.e., because a “stop-and-frisk warrant” is an impossibility – the reasonableness of stops and frisks is not to be judged by the presence or absence of probable cause. Probable cause is a component of the Fourth Amendment’s Warrant Clause, and thus a measure of reasonableness where police are engaged in warrant-type activity. But probable cause is not relevant, Brennan wrote, in determining the constitutional reasonableness of police activity that is not of the warrant type.

Id. at 823 (footnotes omitted). Of course, Brennan’s explanation of the relationship between probable cause and the Warrant Clause is a bit misleading. The Court’s prior precedents that did not impose a warrant requirement to undertake certain searches or seizures, for example, warrantless arrests, United States v. Watson, 423 U.S. 411 (1976); searches involving exigent circumstances, Warden v. Hayden, 387 U.S. 294 (1967); and car searches, have nonetheless required probable cause to validate the police intrusion. Therefore, the inapplicability of the Warrant Clause to the facts in Terry did not automatically justify jettisoning the probable cause rule. One could argue that the Court’s approval of frisks on less than probable cause was inconsistent with Carroll if one believes that the privacy and dignity of the body merit the same constitutional protection afforded a vehicle or suitcase.

As the Court applied and expanded Terry, “Justice Marshall came to regret his vote in Terry.” Id. at 827, n.465. While Justice Brennan never explicitly disavowed his vote or influence on the outcome in Terry, he did articulate the inherent problem with a reasonableness test for deciding search and seizure cases. See United States v. Sharpe, 470 U.S. 675, 720-21 (1985) (Brennan, J., dissenting) (“the Court has moved a step or two further in what appears to be ‘an emerging tendency on the part of the Court to convert the Terry decision into a general statement that the Fourth Amendment requires only that any seizure be reasonable,’ United States v. Place, 462 U.S. 696, 721, (Blackmun, J., concurring in judgment)—a balancing process in which the judicial thumb apparently will be planted firmly on the law enforcement side of the scales.”

122 See at 155.
generally and case law on policing cars specifically built on each other.”123 In sum, Carroll and Terry “were mutually reinforcing.”124

Today, motorists experience the impact of this combined power. Police routinely stop motorists on suspicion of a traffic violation or some other offense, and after a few questions, the driver or a passenger is arrested.125 And it does not matter that the police are wrong about the law and the motorist has committed no traffic violation; the stop is constitutionally valid (and so is the subsequent arrest).126 “That an arrest could begin with suspicion amounted to an astounding expansion of the

---

123 Seo at 153.
124 Seo at 153 (footnote omitted).
126 Thus, even when police initiate a traffic stop based on an erroneous view of the traffic law, and the motorist has committed no offense, the Court has upheld the stop and later arrest of the motorist and his passengers. Heien v. North Carolina, ___ U.S. ___, ___ (2014) (holding that reasonable suspicion for a traffic stop can rest on a mistaken understanding of the scope of a legal prohibition). There are several problems with Heien, including, “the principle it endorsed ... applies to enforcement of laws concerning serious and non-serious offenses alike,” and Heien’s “reasoning will likely be applied beyond the context of investigative stops.” Wayne A. Logan, Cutting Cops Too Much Slack, 104 Geo. L. J. Online 89, 92 (2015). Equally troublesome is the combined impact of Heien and Whren v. United States, 517 U.S. 806 (1996). As discussed below, see notes _____ and accompany text, Whren authorized pretextual traffic stops provided the police had probable cause of an actual traffic violation. “As bad as Whren was standing in isolation, ‘there still had to be a violation of law,’ an ‘actual, real, hard, passes muster with a court, violation of law,’ but now with Whren plus Heien the pretext license has been broadened to instances where the unfortunate object of police scrutiny has merely come ‘close to a violation.’” 2 Wayne R. LaFave, Search and Seizure, A Treatise on the Fourth Amendment, § 3.2(b) at 10 (2012) (2015-2016 Pocket Part) (footnotes omitted).
police’s power.”¹²⁷ This is, however, the reality of policing in modern America where cars are everywhere and police watch them.

B. *Carroll* Leads to Greater Police Authority

Although only two Justices dissented in *Carroll*, it was a controversial ruling.¹²⁸ A few years after it was announced, one legal scholar, “in a devastating critique,”¹²⁹ condemned *Carroll* for, *inter alia*, permitting “exploratory” searches, and argued the discretion to search cars afforded by *Carroll* “condones a more reprehensible practice than that exercised by British officials in colonial times.”¹³⁰ Yet, despite its problems, *Carroll* could be read narrowly as only allowing warrantless searches of cars when congress authorized such searches. In 1948, that

¹²⁸ See, e.g., Forrest R. Black, *A Critique of the Carroll Case*, 29 Colum. L. REV. 1068, 1098 (1929); cf. Landynski, supra note ___ at 87 (stating that *Carroll* and its early progeny “have generated powerful judicial controversy”); Seo, supra note _____ at 140 (noting that “[m]uch of the legal commentary … criticized [Carroll] for giving ‘discretionary carte blanche to prohibition officers’ and a Mississippi judge denounced *Carroll* as ‘erroneous’ and warned that it ‘would ‘make petty tyrants of policemen,’ ‘harass and discommode’ citizens, and ‘speedily become intolerable.’”) (footnote omitted).
¹²⁹ Landynski, supra note ___ at 90.
was how Justice Jackson’s majority opinion in *United States v. Di Re*\(^{131}\) read *Carroll*. “[T]he *Carroll* decision falls short of establishing a doctrine that, without such legislation, automobiles nonetheless are subject to search without warrant in enforcement of all federal statutes. This Court has never yet said so.”\(^{132}\) Assuming without deciding that a warrantless search of a car based on probable cause was constitutional in the absence of congressional approval, *Di Re* ruled that the assumed right to search a car did not include the right to search *passengers* found inside the car.\(^{133}\)

One year later, however, the Court was confronted with the issue *Carroll* and *Di Re* left open: did the Constitution permit a warrantless search of a car in the absence of congressional authorization? *Brinegar v. United States*,\(^{134}\) which involved a factual scenario that resembled

\(^{131}\) 332 U.S. 581 (1948).  
\(^{132}\) 332 U.S. at 585.  
\(^{133}\) The government argued that the authority to search a car for contraband items includes the authority to search occupants of the car “because ‘common sense demands that such [authority] exist in a case such as this where the contraband sought is a small article which could easily be concealed on the person.’” Id. at 586. The Court viewed this position as an extension of *Carroll* and ruled that “a person, by mere presence in a suspected car, [does not] lose[] immunities from search of his person to which he would otherwise be entitled.” Id. at 587.  
\(^{134}\) 338 U.S. 160 (1949).
*Carroll,* gave the Court the chance to address this question, and to
determine whether *Carroll* was correctly decided.135

While parked beside a highway, federal officers recognized Virgil
Brinegar’s Ford drive past. One of the agents had arrested Brinegar
“about five months earlier for illegally transporting liquor; had seen
[Brinegar] loading liquor into a car or truck in Joplin, Missouri, on at
least two occasions during the preceding six months [which was
perfectly legal because Missouri was not a “dry” state]; and knew
[Brinegar] to have a reputation for hauling liquor.”136 When Brinegar’s

135 Seo smartly juxtaposes *Brinegar* with *Wolf v. Colorado,* 338 U.S. 25 (1949). The common
view of *Wolf* is that a unanimous Court held the Fourth Amendment applicable to the States
through the Fourteenth Amendment’s Due Process, but rejected the position that the Due
Process Clause requires state courts to exclude evidence that would be inadmissible in federal
courts because it was obtained in violation of the Fourth Amendment. The Justices “heard
argument for the two cases on the same day in October, and they issued decisions in both cases
on the same June day.” Seo at 159. According to Seo, “[j]uxtaposing the two cases reveals a
jurisprudential map of how the Court ultimately drew the boundary between arbitrary police
power and lawful discretionary power.” Pairing the cases show “that the distinction between
houses and cars mattered when the justices determined what the police could and could not
do.” Put differently, “the constitutional definition of arbitrary policing would depend on
whether or not the police were policing cars.” Id. at 160.

Like most judges and scholars, Professor Seo reads *Wolf* as applying the Fourth Amendment
to the States. See id. at 161: (“In other words, according to *Wolf,* the due process clause
encompassed the right to be free from unreasonable searches and seizures.”). I disagree. The
conventional understanding of *Wolf* is not an accurate reading of *Wolf.* I explain why in greater
detail in *The Supreme Court and the Fourth Amendment’s Exclusionary Rule* 44-52, 70-82
(2013).

136 338 U.S. at 162.
Ford drove past, the officers observed it to be “‘heavily loaded’ and ‘weighted with something.’”137 After forcing Brinegar’s car off the road, one officer greeted Brinegar by asking “‘Hello, Brinegar, how much liquor have you got in the car this time?’” Brinegar replied: “‘Not too much.’”138 A search of the Ford revealed several cases of liquor. After Brinegar was convicted of illegally transporting into a “dry” state, he appealed to the Court contending that the police intrusion violated the Fourth Amendment because the officers lacked probable cause to search his car.

Seo writes that the Justices were “conflicted about how much power the police had claimed under Carroll’s automobile exception.”139 Initially the Court voted five-to-four to affirm the conviction.140 Justice Rutledge agreed that Carroll controlled the case, but told his colleagues that he “would overrule it.”141 Eventually, however, Rutledge and

141 Seo at 164.
Justice Douglas, both considered strong proponents of civil liberties, changed their votes in favor of the government, while Justice Jackson, a highly-respected conservative jurist, switched his vote in favor of Brinegar. Seo believes the “flip-flopping votes reflected [the Court’s] uncertainty” regarding Carroll. In the end, Rutledge authored an opinion finding probable cause under the facts; Jackson dissented.

Despite his strong civil liberties credentials, Justice Rutledge “did not even consider the question of whether the warrantless search of an automobile was constitutionally reasonable when not authorized by legislation; he simply assumed that it was.” On the other hand, an aspect of Rutledge’s opinion is remarkably candid. He twice acknowledges the “troublesome line posed by the facts in the Carroll

142 Seo at 164.
143 On Justice Rutledge’s commitment to civil liberties while on the Court, see John M. Ferren, Salt of the Earth, Conscience of the Court: The Story of Wiley Rutledge (2014). Ferren describes Rutledge’s opinion in Brinegar as “his least felicitous effort.” Id. at 357.
144 Jacob W. Landynski, SEARCH AND SEIZURE AND THE SUPREME COURT: A STUDY IN CONSTITUTIONAL INTERPRETATION 94 (1966); see also Eldon D. Wedlock, Jr., Car 54 – How Dare You!: Toward a Unified Theory of Warrantless Automobile Searches, 75 Marq. L. Rev. 79, 86 (1991) (“[I]n Brinegar v. United States, the statutory limits of the Carroll rule were surpassed for the first time.”). Justice Rutledge cites Carroll for the legal norm that warrantless searches of cars are constitutionally reasonable when based on probable cause. 338 U.S. at 164.
case and this case is one between mere suspicion and probable cause.”145 Nonetheless, Rutledge explains “[t]hat line necessarily must be drawn by an act of judgment formed” under the totality of the facts.146 It also matters that neither case involved searching a “home or any other place of privacy.”147 Put differently, after admitting that the facts in Carroll and Brinegar “may have fallen just short of probable cause,”148 Rutledge rules that cases like Carroll and Brinegar must be resolved “in deference to the officers’ ‘act of judgment.’ After all, the agents’ suspicions were dead on: Brinegar was, in fact, transporting illegal liquor. So were the Carroll brothers.”149 Seo rightly describes this as an “ends-justify-the-means logic.”150 Equally noteworthy, both Carroll and Brinegar approve

145 338 U.S. at 176. A page later, he writes: “The question presented in the Carroll lay on the border between suspicion and probable cause.” Id. at 177.
146 338 U.S. at 176.
147 Id. at 176.
148 Seo at 166. Justice Burton went even further in his willingness to uphold the stop and search. He argued police officers “are commissioned to represent the interests of the public in the enforcement of the law and this requires affirmative action not only when there is reasonable ground for an arrest or probable cause for a search but when there is reasonable ground for an investigation.” 338 U.S. at 179 (Burton, J., concurring). In other words, Burton was willing to permit seizures and searches of vehicles on less than probable cause.
149 Seo at 166.
150 Seo at 166. She adds:

“[F]or the majorities in both Carroll and Brinegar, the exigencies of crime control took priority. Their deference to law enforcement indicated that the public’s interest in a crime-free, and alcohol-free community far outweighed a vigorous review of the police’s
car searches “primarily because of the driver’s past record, not because of any real evidence that the automobile was being used in the commission of a crime at the time.”\textsuperscript{151}

By contrast, Justice Jackson’s dissent will long be remembered as “the most eloquent opinion” he wrote in a Fourth Amendment case.\textsuperscript{152} Jackson saw Rutledge’s opinion as an “extension” of Carroll “which already has been too much taken by enforcement officers as blanket authority to stop and search cars on suspicion.”\textsuperscript{153} Jackson did not let Brinegar’s guilt sway his understanding of the Fourth Amendment. “One takeaway from [\textit{Brinegar}] was that actions that skirted the boundary of illegality might not count as arbitrary if the police got the right person.”\textsuperscript{154} While perhaps susceptible to this view – “[a]fter all, [Jackson] had initially voted to affirm [Brinegar’s] conviction”\textsuperscript{155} – in

\textsuperscript{151} Jacob W. Landynski, \textit{SEARCH AND SEIZURE AND THE SUPREME COURT: A STUDY IN CONSTITUTIONAL INTERPRETATION} 96 (1966).

\textsuperscript{155} Id.
the end, Jackson came to a different conclusion. For Jackson, freedom from unreasonable searches and seizures was just as important as freedom of speech and religion.\footnote{Id. at 180 (Jackson, J., dissenting) (noting that Fourth Amendment freedoms “are not mere second-class rights but belong in the catalog of indispensable freedoms”).} Because the judiciary was best positioned to protect Fourth Amendment freedoms, Jackson believed that it was incumbent to see that “a search against Brinegar’s car must be regarded as a search of the car of Everyman.”\footnote{Id. at 181 (Jackson, J., dissenting).} In other words, while Brinegar “was guilty, he represented every innocent person who had been pulled over and searched without lawful reason.”\footnote{Seo at 169. She adds: “The idea of Everyman suggested implicit in the definition of arbitrariness was a distinction between the guilty and the innocent. In other words, to become a problem of arbitrary policing, it had to affect the law-abiding.” Id.} 

C. From Arbitrary Policing to Discriminatory Policing

By the midpoint of the twentieth-century, arbitrary policing was alive and well.\footnote{Seo at 156-58, 171-82 (detailing examples of alleged arbitrary and random stops of motorists, including “secret roadblocks” in Los Angeles).} Of course, during this time, discriminatory policing was also pervasive, if not more prevalent.\footnote{Cf. Seo at 169 (“To be sure, midcentury Americans recognized, to varying degrees, that the police picked on racial minorities. Organizations such as the NAACP were calling attention to...”)} “Still, most jurists...
understood arbitrary and discriminatory policing as distinct concepts: arbitrariness selected its victims at random, whereas discrimination targeted specific groups.”161 Justice Jackson’s dissent in Brinegar focused on the former; he believed that Carroll and Brinegar afforded police too much discretion to stop and search innocent motorists.

Nearly fifty years later, however, “the problem of arbitrary policing had narrowed to discriminatory policing.”162 And by the end of the twentieth-century, police learned to use the law to their advantage. For example, “police have raised traffic stops to an art form.”163 Police employ the traffic code and regulations governing vehicle equipment and condition “as a pretext to stop drivers they want to question and even search them.”164 Of course, these stops are not about enforcing the police lawlessness against black citizens.”). See also id. at 183-90 (detailing examples police of abuse, violence and killings of black motorists from the 1930’s to 1950’s).

Harris, Profiles in Injustice: Why Racial Profiling Cannot Work 30 (2002); see also, Gary Webb, DWB, Esquire, April 1999 (describing the federal Operation Pipeline program which teaches state and local police how to use traffic stops for drug interdiction purposes); id. at 125 (describing one police instructor’s view: “If they [the driver] refuse [a police request to search the car], the stuff’s in the trunk,’ our CHP (California Highway Patrol) instructor tells us matter-of-factly. A refusal justifies calling out the dogs and letting a drug-sniffing canine take a walk around your car. ... Most drivers consent.”

164 Id.
traffic law, but instead are “fishing expeditions” for criminal conduct.

Seo nicely describes the evolution of the law of policing automobiles:

At midcentury, the problem was the potential for police action without basis in law, so Everyman needed the exclusionary rule to deter unlawful policing. At century’s end, the problem had become police action that did have a basis in law but that departed from normal practice. Put simply, police treated minorities differently.165

In 1996, the Court was presented the opportunity to address this problem. The defendants in Whren v. United States166 argued using a traffic stop as a pretext to conduct an investigation for other crime violated the Fourth Amendment. The Court, not surprisingly, disagreed. A unanimous Court held that a traffic stop based on probable cause is constitutionally permissible regardless of police motive – even motive based on racial stereotypes or bias – because the subjective intent of the police is irrelevant. “[T]he Fourth Amendment’s concern with ‘reasonableness’ allows certain actions to be taken in certain circumstances, whatever the subject intent”167 of law enforcement.

165
167 Id. at 814.
*Whren* is not only “notorious for its effective legitimation of racial profiling in the United States.”\(^{168}\) It is a constitutional disgrace.\(^{169}\) Rather than rehash *Whren*’s many flaws, I will highlight Seo’s contribution to understanding how *Whren* fits within the history of policing cars. One argument proffered by the *Whren* defendants was that the plainclothes officers who conducted the traffic stop were barred by police department policy from making routine traffic stops. Essentially, the defendants contended that a traffic stop cannot be constitutionally reasonable when officers violate their own departmental rules. The Court responded that this argument – to equate violation of departmental rules with constitutional wrongs – would make the traffic code “a dead letter at the option of the police department.”\(^{170}\)

---

\(^{169}\) Criticism of *Whren* is vast and cogent. See 1 LaFave, *supra* note ____, § 1.4(f), at 176 n.86 (citing articles criticizing *Whren*). The adverse effect *Whren* has had on black motorists was demonstrated when, in order to protect the Fourth Amendment rights of blacks living in Ferguson, Missouri, the federal government required that Ferguson police officers refrain from exercising police authority—pretextual traffic stops—that a unanimous Supreme Court had ruled was constitutional. See Consent Decree, United States v. City of Ferguson, No. 4:16-cv-000180-CDP (E.D. Mo. Mar. 17, 2016) at 20 (“FPD [Ferguson Police Department] officers will not conduct pretextual stops except where the actual reason for the stop is to investigate a felony.”).

\(^{170}\) Transcript of Oral Argument at ___, 517 U.S. 806 (1996) (No. 95–5841). Seo helpfully notes that during oral argument, one Justice remarked: “the police don’t have the authority to tell the
The Court’s rejection of this claim, as Seo explains, “did not consider how police departments did effectively repeal traffic laws when they issued a policy or adopted a general practice of non-enforcement.”171 Moreover, Whren ignored “how selective enforcement was unavoidable because the laws as well as their violations were so numerous.”172 Ultimately, Whren’s allowing pretextual stops and the inevitable racial profiling that encourages such stops was of a piece with Carroll and Brinegar. In 1925, Carroll demonstrated that the Court would not closely scrutinize police decisions to stop and search bootleggers. The Court’s ruling licensed lower courts to do the same. Nearly twenty-five years later, when confronted with the “ditch[ing]”173 and search of an automobile based on facts that straddled the line “between mere suspicion and probable cause,”174 and knowing that Carroll had been perceived by law enforcement “as blanket authority to

173 Brinegar, 338 U.S. at 187 (Jackson, J., dissenting).
174 Id. at 176 (Jackson, J., dissenting).
stop and search cars on suspicion,”\textsuperscript{175} Brinegar explained that the Court would defer to “act of judgment” by police. In light of this history, no one should be surprised that Whren, employing the same “reasonableness” model embraced by Carroll and Brinegar, would allow racial profiling via traffic stops to proceed unabated by Fourth Amendments rules.

Seo writes that search and seizure doctrine

had not evolved over the twentieth century to deal with lawful, but racially motivated, policing. It developed to allow ‘reasonable’ investigations during vehicle stops. But by enabling discretionary policing, the Fourth Amendment had also created opportunities for racial profiling.\textsuperscript{176}

This description insinuates that “the Fourth Amendment” is responsible for the race-based traffic stops that exist today. Seo is being politic. The Fourth Amendment did not create Carroll, Brinegar and Whren; the Justices of the Supreme Court did. They are the ones to credit (or blame)

\textsuperscript{175} Brinegar, 338 U.S. at 183 (Jackson, J., dissenting).
\textsuperscript{176} Seo at 164 (footnote omitted)
for the degree of discretion police can employ and the minimal constitutional liberty motorists possess.

Part II. From Bad to Worse: From Searching Cars to Searching Containers in Cars

Some scholars and judges may scoff at the claim that *Carroll* is responsible for the racial profiling that currently occurs on America’s roads. Professor Seo’s research and analysis, however, persuades me that the discretionary authority that *Carroll* gave police was a harbinger of what was to come and that *Whren* is simply another manifestation of the power granted in *Carroll*. To be sure, *Carroll*’s holding could have been cabined if the Justices were willing to do so. Justice Jackson, for one, tried to restrain the scope of *Carroll*. And it would not have required much judicial ingenuity to limit the police authority afforded by *Carroll* (and its extension in *Brinegar*).

There are sound and neutral principles why police, in most circumstances, should have to obtain warrants before searching vehicles. From a textualist perspective, a person’s vehicle is “one of his ‘effects’
and hence within the express protection of the Fourth Amendment.”\textsuperscript{177} As Justice Scalia noted in a different context, “[t]he text of the Fourth Amendment reflects its close connection to property”\textsuperscript{178} and no one disputes that vehicles, despite being subject to pervasive governmental regulation, are property of their owners. Accordingly, because there is no doubt that the amendment protects effects as well as persons, homes and papers, and because the Warrant Clause does not differentiate “between searches conducted in private homes and other searches,”\textsuperscript{179} the burden should fall to the government to show why a warrantless vehicle search was necessary under the specific facts of a case.

Furthermore, if the Constitution does not permit warrantless searches of, say, suitcases, footlockers, packages placed in the mail or other effects seized by the police, notwithstanding probable cause that those effects harbor evidence of criminality, it is not self-evident why a similar rule should not apply to vehicles under the control of the police.

“If movable property outside automobiles generally can be detained

\textsuperscript{177} Brinegar, 338 U.S. at 182 (Jackson, J., dissenting).
\textsuperscript{179} Chadwick, 433 U.S. at 8.
while a warrant is sought and searched only after such a warrant has been obtained (absent exigent circumstances), the same rule should apply to automobiles.”

Indeed, there was a time when several of the Justices (but never five or more in a single opinion) appreciated that the cars should be treated like other effects for purposes of the Fourth Amendment. Ironically, it was Justice Harlan, “The Great Dissenter of the Warren Court,” in a car case at the start of the Burger Court, who recognized this parallel logic and scolded his colleagues for “shunting aside th[e] vital Fourth Amendment safeguard” that is the warrant requirement in a scenario where the police could have easily obtained a warrant to authorize searching a car. One year later, *Coolidge v. New Hampshire*,

---

182 *Chambers v. Maroney*, 399 U.S. 42, 61-64 (1970) (Opinion of Harlan, J.); id. at 61 (“The Court has long read the Fourth Amendment’s proscription of ‘unreasonable’ searches as imposing a general principle that a search without a warrant is not justified by the mere knowledge by the searching officers of facts showing probable cause. ... Fidelity to this established principle requires that, where exceptions are made to accommodate the exigencies of particular situations, those exceptions be no broader than necessitated by the circumstances presented.”).
183 *Chambers v. Maroney*, 399 U.S. 42, 64, n. 9 (1970) (Opinion of Harlan, J.). In *Chambers*, the occupants of a vehicle were arrested for an armed robbery. The vehicle was seized and taken to
held a search of an automobile unconstitutional when the facts gave
police ample time and means to obtain a warrant.\(^\text{184}\) In explaining this
result, \textit{Coolidge} famously stated that the “word ‘automobile’ is not a
talisman in whose presence the Fourth Amendment fades away and
disappears.”\(^\text{185}\) Indeed, \textit{Coolidge} adopted a measured and traditional

\footnotesize{a police station, where it was searched. Evidence from the search was admitted at trial. The
Court upheld the search, though conceding that “because of the preference for a magistrate’s
judgment, only the immobilization of the car should be permitted until a search warrant is
obtained; arguably, only the ‘lesser’ intrusion is permissible until the magistrate authorizes the
‘greater.’” Id. at 51. Notwithstanding this logic, which at the time was the constitutional rule for
searching packages placed in the mail, see United States v. Van Leeuwen, 397 U.S. 249 (1970),
\textit{Chambers} found, for Fourth Amendment purposes, no difference between “on the one hand
seizing and holding a car before presenting the probable cause issue to a magistrate and on the
other hand carrying out an immediate search without a warrant.” 399 U.S. at 52. Following the
“reasonableness” of \textit{Carroll}, the Court concluded that “[g]iven probable cause to search, either
course is reasonable under the Fourth Amendment.” Id.

Justice Harlan’s dissent noted, \textit{inter alia}, that this conclusion was inconsistent with the
Court’s previous “insistence in other areas that departures from the warrant requirement
strictly conform to the exigency presented.” Id. at 62-63 (Opinion of Harlan, J.).
\(^\text{184}\) 403 U.S. 443 (1971). Justice Stewart’s opinion cited several factors why the warrantless
search was unreasonable: The police had known for some time the car’s involvement in the
murder; the defendant knew he was a suspect, but “there was no indication that he meant to
flee”; on the night the car was seized, it was not being used “for any illegal purpose” and
regularly parked in the driveway of the defendant’s home; the objects the police sought from
the car “were neither stolen nor contraband nor dangerous” and finally, after the defendant
was arrested in his home, there was no way he could have accessed the vehicle and the
defendant’s premises were guarded throughout the night by two policemen.” Id. at 460-61
(footnote omitted). For good measure, Justice Stewart remarked that if the logic of \textit{Carroll}
permits a search of a car under these conditions, “then it would permit as well a warrantless
search of a suitcase or a box.” But Stewart noted no precedent “suggests such an extension of
\textit{Carroll}.” Id. at 461, n. 18.
\(^\text{185}\) 403 U.S. at 461-62 (Opinion of the Court). In light of his separate opinion in \textit{Chambers}, it is
not evident why Justice Harlan did not join this portion of Justice Stewart’s opinion. Regarding
\textit{Chambers’} holding, Justice Stewart conceded that there was no exigency justifying the
warrantless search there. 403 U.S. at 463, n. 20. Nonetheless, he explained that the “rationale
view of Carroll: “Carroll, on its face, appears to be a classic example of the doctrine that warrantless searches are per se unreasonable in the absence of exigent circumstances. Every word in the opinion indicates the Court’s adherence to the underlying rule and its care in delineating a limited exception.”\(^{186}\) Of course, Coolidge’s approach to cars and warrants has not been embraced by today’s Justices.\(^ {187}\) But to fully understand Fourth Amendment history and doctrine, one should know that Justice Harlan and the Coolidge plurality offered an alternative vision for applying the Fourth Amendment to cars.

While fidelity to Fourth Amendment norms would favor the approaches urged by Justice Harlan and Coolidge, one must concede that there is a neutral principle for treating cars differently from other effects. If Chambers had announced a contrary rule,

\(^{186}\) 403 U.S. at 479 (Opinion of the Court).

\(^{187}\) It bears noting that Coolidge’s ruling has never been formally disavowed. That said, the results in Maryland v. Dyson and Pennsylvania v. Labron, discussed supra note _____, have effectively made Coolidge a deadletter.
it would have imposed a constitutional requirement upon police departments of all sizes around the country to have available the people and equipment necessary to transport impounded automobiles to some central location until warrants could be secured. Moreover, once seized automobiles were taken from the highway the police would be responsible for providing some appropriate location where they could be kept, with due regard for the safety of the vehicles and their contents, until a magistrate ruled on the application for a warrant. Such a constitutional requirement therefore would have imposed severe, even impossible, burdens on many police departments. No comparable burdens are likely to exist with respect to the seizure of personal luggage.\(^{188}\)

This position, of course, is not mandated by constitutional text, but instead reflects federalism values.\(^ {189}\) In essence, the financial costs the states would incur if Carroll’s admonition about obtaining warrants had been taken seriously would be too much.

Whatever one thinks about the merits of this conclusion, these costs concerns are irrelevant when deciding the authority of police to

\(^{189}\) The Court took a similar approach in *County of Riverside v. McLaughlin*, 500 U.S. 44 (1991), when the Court rejected an arrestee’s claim that he should have been afforded a judicial determination of probable cause within 24 hours of his arrest. The Court explained that states should have the flexibility to combine a probable cause hearing with other pre-trial proceedings, thus elevating federalism concerns over an individual’s interest in obtaining a prompt judicial determination of probable cause for his arrest.
search containers and other effects found in cars. The Justices have not disagreed. Yet, the Court, has ruled repeatedly that warrantless searches of containers discovered in cars are permissible based on probable cause.\textsuperscript{190} Seo, again, traces this development to \textit{Carroll}.

By century’s end, the logic of \textit{Carroll} had reached its fullest potential. [Rulings from the1980’s to the 1990’s] established brighter-line rules that gave the police a great deal of discretionary authority. The inevitability of case-by-case adjudication under the standard of reasonableness also favored the police, especially when evidence of guilt could slant the ex post facto narrative told in court.\textsuperscript{191}

Ultimately, Seo explains that the Justices extended \textit{Carroll}’s logic to the very different issue of a warrantless search of a container found within a car because motorists had “‘a lesser expectation of privacy in a motor vehicle.’”\textsuperscript{192} Seo is again being diplomatic in her characterization of the Court’s reasoning. Nobody – including the Justices – sincerely believe that motorists have diminished privacy interests in purses, wallets and suitcases placed in cars. As the remainder of this section

\textsuperscript{191} Seo at 254.
\textsuperscript{192} Seo at 254.
explains, what propelled the results in these cases were fictional claims regarding motorists’ privacy in their effects, intellectually dishonest reasoning and an effort to make car searches easier.\textsuperscript{193}

\textbf{A. Fictional View of Motorists’ Privacy}

Generally speaking, the notion that motorists possess a lesser expectation of privacy in their vehicles has not withstood scrutiny.\textsuperscript{194}

\begin{flushright}
\begin{enumerate}
\item \textsuperscript{193} The important cases are United States v. Chadwick, 433 U.S. 1 (1977), Arkansas v. Sanders, 442 U.S. 753 (1979), United States v. Ross, 456 U.S. 798 (1982) and California v. Acevedo, 500 U.S. 562 (1991). These cases and all of the Court’s other vehicle search cases are expertly described and critiqued in 3 LaFave, Section 7.2, pages 721-89.
\item \textsuperscript{194} Justice Blackmun was an early proponent of the view that motorists have “a lesser expectation of privacy in a motor vehicle because its function is transportation and it seldom serves as one’s residence or as the repository of personal effects.” Cardwell v. Lewis, 417 U.S. 583, 590 (1974) (Opinion of Blackmun, J.). Blackmun’s assertions were particularly reckless because \textit{Katz} addressed whether paint scrapings from the exterior of an automobile and an observation of the tread of a tire was unreasonable without a warrant. Rather than confine his remarks about motorists’ privacy to the facts, however, Blackmun’s view of motorists’ privacy was stated in general terms to include the interior of the car and containers therein. Professor Lewis Katz has nicely summarized why this view is, at best, a legal fiction:
\begin{quote}
[T]he driver or occupant of a vehicle who places objects under the seat, in a locked or unlocked glove compartment, or in a trunk does not surrender his expectation of privacy in those items. Although \textit{Katz} [v. \textit{United States}, 389 U.S. 347 (1967)] recognized that one surrenders his privacy in that which he places in public view, \textit{Katz} and \textit{Chadwick} specifically recognize that an individual may protect his privacy by taking precautions. That is exactly what the occupant of an automobile does when he places items out of sight, whether or not in closed compartments.
\end{quote}

\begin{quote}
... [A]lthough the automobile is primarily used for transportation, it can also be used as a repository for personal effects. There are probably few Americans who have not at one time or another used their cars for storage, albeit unwisely. All personal effects so stored are entitled to fourth amendment protection; constitutional guarantees are not
\end{quote}
\end{enumerate}
\end{flushright}
Extending this belief to containers discovered inside of a car makes no sense if a court intends to protect privacy interests. If a briefcase, purse, or a 200 pound footlocker carried by a pedestrian cannot be subjected to a warrantless search notwithstanding probable cause that it contains evidence of criminality, a warrantless search should not be permitted the

reserved only for valuable possessions carefully protected by their owners. Most Americans view the automobile as more than merely a means of transportation.

Finally, the high degree of government regulations does not support the excessive diminution of fourth amendment protection of the automobile which accompanies application of the automobile exception. A legitimate interest in securing compliance with safety and traffic regulations should not be used to justify a reduced expectation of privacy in the entire vehicle.

Indeed, the Court itself has, on occasion, acknowledged that motorists expect and deserve Fourth Amendment protection while on the road. See Arkansas v. Sanders, 442 U.S. 753, 764 (1979) (“[A] suitcase taken from an automobile stopped on the highway is not necessarily attended by any lesser expectation of privacy than is associated with luggage taken from other locations. One is not less inclined to place private, personal possessions in a suitcase merely because the suitcase is to be carried in an automobile rather than transported by other means or temporarily checked or stored. Indeed, the very purpose of a suitcase is to serve as a repository for personal items when one wishes to transport them.”) (footnote omitted); United States v. Ross, 456 U.S. 798, 823 (1982) (“Certainly the privacy interests in a car’s trunk or glove compartment may be no less than those in a movable container. An individual undoubtedly has a significant interest that the upholstery of his automobile will not be ripped or a hidden compartment within it opened.”); cf. Delaware v. Prouse, 440 U.S. 648, 662 (1979) (“Automobile travel is a basic, pervasive, and often necessary mode of transportation to and from one’s home, workplace, and leisure activities. Many people spend more hours each day traveling in cars than walking on the streets. Undoubtedly, many find a greater sense of security and privacy in traveling in an automobile than they do in exposing themselves by pedestrian or other modes of travel.”).
moment the pedestrian puts his or her effect in a car and becomes a motorist. The Court, however, has decided otherwise.

For example, Wyoming v. Houghton\textsuperscript{195} addressed whether police can search a passenger’s purse found inside a car when they have probable cause to search the car for drugs, but lack particularized cause that the purse contains drugs. Speaking for a majority, Justice Scalia announced a \textit{per se} rule that where there is probable cause to search for contraband inside a car, it is reasonable for the police to examine packages and containers of passengers without a showing of individualized probable cause for each one. Justifying this result under a “balancing” analysis\textsuperscript{196}, Scalia asserts that passengers, like drivers, have a reduced expectation of privacy with regard to property transported in cars. Specifically, he states that cars “seldom serv[e] as … the repository of personal effects, are subjected to police stop and examination to enforce ‘pervasive’ governmental controls ‘[a]s an everyday

\textsuperscript{195}526 U.S. 295 (1999).

\textsuperscript{196}At the start of his analysis section, Scalia read “the historical evidence to show that the Framers would have regarded as reasonable (if there was probable cause) the warrantless search of containers \textit{within} an automobile.” Houghton, 526 U.S. at 300.
occurrence,’ and, finally, are exposed to traffic accidents that may render all their contents open to public scrutiny.” 197

Who believes this? People routinely place property and effects, such as wallets, purses, knapsacks and envelopes, in cars fully expecting that those items will remain private. Purses and knapsacks often contain a passenger’s (and driver’s) most intimate and private items and there is no everyday type of regulation of vehicular traffic that calls for routine inspection of a passenger’s purse or knapsack. 198 Equally unconvincing is Scalia’s final reason for a reduced privacy interest – containers in cars are “exposed to traffic accidents” that reveal their contents to public viewing. As Professor LaFave has noted, this is another “invited” justification, 199 and, in my view, has no basis in the real world of motorists.

B. Intentionally Misleading Reasoning

Professor Seo briefly mentions California v. Acevedo and describes it as one of a series of bright-line rules meant to give police “a

197 526 U.S. at 303 (citations omitted).

199 Id.
For me, *Acevedo* is the exemplar of the modern Court’s intellectually dishonest reasoning in car cases. Examining the government’s argument in *United States v. Chadwick* and Justice Blackmun’s dissent in *Chadwick* is essential to understand the degree of *Acevedo*’s misleading reasoning. As described below, although Blackmun dissented in *Chadwick*, he wrote for a majority of the Court in *Acevedo*.

In *Chadwick*, federal officers in Boston had probable cause that a 200 pound footlocker that had just arrived on a train contained marijuana. The officers watched the suspects load the footlocker into the trunk of Chadwick’s car, which was waiting outside the train station. While “the trunk of the car was still open and before the car engine had been started,” all of the suspects were arrested. The officers then took the footlocker to the Federal Building in Boston, and an hour and a half after the arrests, opened the footlocker and found marijuana.

---

200 Seo at 254.
202 433 U.S. at 4.
At the Supreme Court, the Solicitor General argued that the Warrant Clause protects only interests traditionally identified with the home. The government contended that the Warrant Clause was adopted mainly to counter unjustified intrusions into private homes on the authority of general warrants and writs of assistance. Relying on this history, the government submitted that only homes, offices and private communications implicate interests which lie at the core of the Fourth Amendment. In all other contexts, the government insisted that less significant privacy interests are at stake, and the reasonableness of a challenged search should turn on whether probable cause exists. As a fallback position, the government argued that the reasoning of the automobile cases demonstrates the reasonableness of allowing warrantless searches of luggage, including the footlocker.

---

207 Id. at 46-49.
government’s view, luggage was analogous to cars for Fourth Amendment purposes.208

Both of the Solicitor General’s arguments were rejected by the *Chadwick* majority. Chief Justice Burger, a law-and-order conservative,209 wrote the majority opinion concluding that the warrantless search violated the Fourth Amendment. Regarding the government’s claim that luggage was analogous to cars, the Chief Justice explained that the automobile exception was based, “in part on [an automobile’s] inherent mobility, which often makes obtaining a judicial warrant impracticable,” and the “diminished expectation of privacy which surrounds the automobile.”210 Justice Blackmun, who,

---

208 As noted in *Chadwick*, 433 U.S. at 11, the government did not argue that the footlocker’s brief time in the trunk of the car “makes this an automobile search” case, and thus justifies the warrantless search under the *Carroll-Chambers* exception.

210 In contrast to cars, Chief Justice Burger explained that the content of luggage is not open to public view; not subject to regular inspection and is intended as a repository of personal effects. *Chadwick*, 433 U.S. at 13. The mobility of the footlocker did not justify a warrantless search because once officers had seized and immobilized it; “it was unreasonable to undertake
unlike Burger, was the darling of the liberals when he retired, however, dissented in *Chadwick*. Although not adopting all of the government’s arguments, Blackmun did accept the government’s claim that the Warrant Clause was inapplicable here; he believed that “a warrant is not required to seize and search any movable property in the possession of a person properly arrested in a public place.” Blackmun conceded that merely seizing the footlocker and awaiting a magistrate’s

*Sanders* was a close replay of the facts in *Chadwick*. Police had probable cause that Sanders’ green suitcase contained marihuana. Police watched as Sanders arrived at an airport, met a companion, retrieved the green suitcase from the baggage service, got in a taxi while the companion placed the suitcase in the trunk of the taxi and joined Sanders in the taxi. After the taxi left the airport, police stopped it and took the suitcase from the trunk and opened it. Inside was marihuana. The Court ruled the search unconstitutional and held that “the warrant requirement of the Fourth Amendment applies to personal luggage taken from an automobile to the same degree it applies to such luggage in other locations.” *Sanders* 442 U.S. at 766. Put simply, *Sanders* ruled that the automobile exception did not authorize police to search personal luggage.

212 433 U.S. at 19 (Blackmun, J., dissenting). This was the same position Blackmun took dissenting in *Arkansas v. Sanders*, 442 U.S. at 769 (Blackmun, J., dissenting) (“The luggage, like the automobile transporting it, is mobile. And the expectation of privacy in a suitcase found in the car is probably not significantly greater than the expectation of privacy in a locked glove compartment or trunk.”).
authorization for a search would have been a less intrusive alternative. However, the mere fact that a warrant could have been obtained did not make the warrantless search unreasonable, according to Blackmun. Why not? “[A] warrant would be routinely forthcoming in the vast majority of situations where the property has been seized in conjunction with the valid arrest of a person in a public place.”\textsuperscript{213} Therefore, requiring police to obtain a warrant “would [not] have much practical effect in protecting Fourth Amendment values.”\textsuperscript{214}

Though he dissented in \textit{Chadwick} and \textit{Sanders}, Justice Blackmun wrote for a majority in \textit{California v. Acevedo}.\textsuperscript{215} At stake was whether police must obtain a warrant to search a closed container found in a vehicle simply because they lack probable cause to search the entire car.\textsuperscript{216} Nine years earlier, \textit{United States v. Ross} left this issue

\footnotesize
\textsuperscript{213} 433 U.S. at 20 (Blackmun, J., dissenting).
\textsuperscript{214} Id. (footnote omitted).
\textsuperscript{216} \textit{Acevedo}, 500 U.S. at 573.
undecided.\textsuperscript{217} The facts of \textit{Acevedo} mirrored the facts in \textit{Sanders}.\textsuperscript{218} Police observed Acevedo place a brown paper bag in the trunk of his car and drive away. Police had probable cause that the bag contained marijuana. Police stopped the car, searched the bag and found marijuana. A California appellate court correctly ruled that \textit{Sanders} and \textit{Ross} controlled.

Justice Blackmun, however, reasoned that the dichotomy created in \textit{Ross}, which allowed a warrantless search of a container discovered during the course of a general search of a car, but disallows the same search where there is only probable cause to search the container, is

\begin{quote}
\textsuperscript{217} 456 U.S. 798 (1982). \textit{Ross} addressed “the extent to which police officers-who have legitimately stopped an automobile and who have probable cause to believe that contraband is concealed somewhere within it – may conduct a probing search of compartments and containers within the vehicle whose contents are not in plain view.” Id. at 800. The Court, speaking through Justice Stevens, held that police "may conduct a search of the vehicle that is as thorough as a magistrate could authorize in a warrant ‘particularly describing the, place to be searched.’” Id. While \textit{Ross} cast doubt on some of the reasoning of \textit{Sanders}, it did not disturb \textit{Sanders}’ holding. 456 U.S. at 824. “This meant that if there was only probable cause to search a particular container in the vehicle but not probable cause to search the vehicle generally, \textit{Ross} did not control and a warrant was required to search the container, but not to seize it.” LaFave Section 7.2(d) at 769 (footnotes omitted).
\end{quote}

\begin{quote}
\textsuperscript{218} Justice Blackmun misleading writes that the facts in \textit{Acevedo} “closely resemble the facts in \textit{Ross}.” \textit{Acevedo}, 500 U.S. at 572. In \textit{Ross}, police had probable cause that Ross was selling drugs “kept in the trunk of a car.” \textit{Ross}, 456 U.S. at 800. By contrast, in both \textit{Sanders} and \textit{Acevedo} police had probable cause that a particular container in the car contained drugs. In both cases, there was no probable cause that other parts of the vehicle contained drugs.
\end{quote}
logically unsound.\textsuperscript{219} According to Blackmun – and this is where the misleading reasoning starts – separate rules for containers “may enable the police to broaden their power to make warrantless searches and disserve privacy interests.”\textsuperscript{220} How does the \textit{Ross} dual-track rule undermine privacy interests of motorists? “If the police know that they may open a bag only if they are actually searching the entire car, they may search more extensively than they otherwise would in order to establish the general probable cause required by \textit{Ross}.”\textsuperscript{221}

Blackmun’s reasoning for abandoning \textit{Ross}’s dual-track rule would be amusing if were not found in the United States Reports. Police need probable cause \textit{before} they begin a search. As any diligent law student in a criminal procedure class knows, an otherwise illegal search cannot be justified in order to validate a lesser intrusion. Thus, just as a

\begin{itemize}
\item \textsuperscript{219} Justice Blackmun acknowledged closed containers seized by the police, whether “found after a general search of the automobile . . . [or] found in a car after a limited search for the container are equally easy for the police to store and for the suspect to hide or destroy.” \textit{Acevedo}, 500 U.S. at 574. And he also recognized that no reason exists to distinguish the privacy expectations of containers based on whether the police had probable cause to search the entire vehicle, or only probable cause to search a specific container. Id.
\item \textsuperscript{220} 500 U.S. at 574.
\item \textsuperscript{221} 500 U.S. at 574-75.
\end{itemize}
search cannot be validated by what it reveals,\textsuperscript{222} so too the police are not free to conduct an extensive search in order to demonstrate legal grounds for a lesser intrusion.\textsuperscript{223}

Justice Blackmun offers another reasoning for abandoning the dual-track rule. He asserts that the dichotomy created in \textit{Ross} provided only minimal protection of privacy interests because once police officers obtain probable cause to seize property, “‘a warrant will be routinely forthcoming in the overwhelming majority of cases.’”\textsuperscript{224} What’s wrong with this argument? For starters, the government made the same argument in \textit{Chadwick} and lost. Indeed, Blackmun’s statement has never been the law. The Court stated long ago that warrantless searches are unconstitutional “‘notwithstanding facts unquestionably showing probable cause.’”\textsuperscript{225} Despite this well-established norm, \textit{Acevedo} ruled

\textsuperscript{222} This is a long-standing principle. See McDonald v. United States, 335 U.S. 451, 456-57 (1948) Johnson v. United States, 333 U.S. 10, 16-17 (1948)

\textsuperscript{223} Professor LaFave calls Blackmun’s reasoning “unmitigated poppycock, for if any point is solidly grounded in Fourth Amendment jurisprudence, it is that the police cannot ‘bootstrap’ themselves into probable cause; a search may not be justified by what turns up in that search.” 3 LaFave, \textit{supra} note ____ at 773 (footnote omitted).

\textsuperscript{224} \textit{Acevedo}, 500 U.S. at 575, quoting \textit{Sanders}, 442 U.S. at 770 (Blackmun, J., dissenting).

\textsuperscript{225} Katz v. United States, 389 U.S. 347, 357 (1967) (quoting Agnello v. United States, 269 U.S. 20, 33 (1925)).
that the Fourth Amendment does not compel a warrant for a car search that extends only to a closed container found inside a car, thus expressly overruling *Sanders.*\(^{226}\)

To be sure, *Acevedo* does not permit willy-nilly searches of cars whenever police have probable cause. It reaffirmed *Ross*’ admonition that “[p]robable cause to believe that a container placed in the trunk of a taxi contains contraband or evidence does not justify a search of the entire cab.”\(^{227}\) But Blackmun’s holding is a gift to the police because it makes searching containers found in cars easier. Although he asserts otherwise,\(^{228}\) Blackmun’s ruling in *Acevedo* is an extension of *Carroll.* In *Sanders*, the Arkansas Attorney General contended that the warrantless search of the suitcase was proper, “not because the property searched was luggage, but rather because it was taken from an

\(^{226}\) 500 U.S. at 579. Seo writes that *Acevedo* “explicitly overrul[ed]” *Chadwick.* Seo at 253. That is mistaken. *Acevedo* dealt with the scope of the automobile exception under *Carroll* and its progeny. *Chadwick*, by contrast, did not address the validity of the search of the footlocker under the automobile exception because the government never made that argument. See 443 U.S. at 11. Further, the footlocker’s contact with the Chadwick’s vehicle was fleeting at best, and so there was no need to address the automobile exception in *Chadwick.*

\(^{227}\) *Acevedo*, 500 U.S. at 580, quoting *Ross*, 456 U.S. at 824.

\(^{228}\) Blackmun states that *Acevedo*’s holding “neither extends the *Carroll* doctrine nor broaden the scope of the permissible automobile search delineated in *Carroll, Chambers,* and *Ross.*” 500 U.S. at 580.
automobile lawfully stopped and searched on the street.”229 Writing for the Court in Sanders, Justice Powell characterized this argument as an extension of Carroll because it “allow warrantless searches of everything found within automobile, as well as the vehicle itself.”230 Yet, this is the rule embraced in Acevedo231 and demonstrates that the modern Court’s view of motorists’ privacy interests is the same, if not narrower, than it was nearly one hundred years ago.232

229 Sanders, 443 U.S. at 762.
230 Id.
231 Justice Blackmun took this position at least since his Chadwick and Sanders dissents. Indeed, in 1982, he told his colleagues during the Conference discussion in Ross that he was prepared to “go through Carroll and let them go whole hog.” Del Dickson, The Supreme Court In Conference (1940 – 1985): The Private Discussions Behind Nearly 300 Supreme Court Decisions 462j (2001). In other words, whenever the police had probable cause, they were permitted to “go whole hog” and search not only the entire vehicle, but also any container found within the vehicle. Justice Blackmun joined Justice Stevens’ opinion in Ross not because he agreed with the logic of Ross, but only so that there would be “an authoritative ruling” from the Court. Ross, 456 U.S. at 825 (Blackmun, J., concurring).
232 If further proof is needed that Acevedo extends, rather than simply applies Carroll, consider the following. In his Coolidge opinion, in the interest of providing clarity regarding the scope of the automobile exception, Justice White proposed that the Court “treat searches of automobiles as we do the arrest of a person.” 403 U.S. at 527 (Opinion of White, J.). The Coolidge majority disagreed and had this response: [I]f we take the viewpoint of a judge called on only to decide in the abstract, after the fact, whether the police have behaved “reasonably” under all the circumstances – in short if we simply ignore the warrant requirement – Carroll comes to stand for something more. The stopping of a vehicle on the open highway and a subsequent search amount to a major interference in the lives of the occupants. Carroll held such an interference to be reasonable without a warrant, given probable cause. It may be thought to follow a fortiori that the seizure and search here – where there was no stopping and the vehicle was unoccupied – were also reasonable, since the intrusion was less substantial, although there were no exigent circumstances whatever. Using
Obviously, *Acevedo* mirrors Justice Blackmun’s dissents in *Chadwick* and *Sanders*. But he needed four additional Justices to obtain a majority to overrule *Sanders*. What caused the other Justices to join Blackmun’s opinion? Evidently, several of the Justices believed that pre-*Acevedo* law placed a premium on police ignorance and was plagued by contradictions. Justice Blackmun stated that the *Ross* and *Sanders* rules created a contradiction such that “the more likely the police are to discover drugs in a container, the less authority they have to search it.”234 Justice Scalia thought it made no sense to require a warrant to search a briefcase “when it is being carried along the street, but for that same briefcase to become unprotected as soon as it is carried into an automobile.”235 But Scalia also agreed with Justice Blackmun that it was anomalous to permit a warrantless

reasoning of this sort, it is but a short step to the position that it is never necessary for the police to obtain a warrant before searching and seizing an automobile, provided they have probable cause. And Mr. Justice White appears to adopt exactly this view when he proposes that the Court should “treat searches of automobiles as we do the arrest of a person.”

403 U.S. at 479 (Opinion of the Court).

234 500 U.S. at 577.

235 500 U.S. at 581 (Scalia, J., concurring in judgment).
search of a locked glove compartment in a car, but require a warrant to permit search of an unlocked briefcase found in a car.\textsuperscript{236} Accordingly, \textit{Acevedo} announces “one clear-cut rule to govern automobile searches and eliminate[s] the warrant requirement for closed containers” found in automobiles.\textsuperscript{237}

These concerns are misplaced. There is nothing strange or contradictory about pre-\textit{Acevedo} law if one keeps in mind the basic adage that a warrantless intrusion must be “strictly circumscribed by the exigencies which justify its initiation.”\textsuperscript{238} In the context of a private container taken from a car, the warrantless \textit{seizure} of the container is justified because of its potential mobility. A warrantless \textit{search}, however, is not justified because the container is – as Justice Blackmun concedes –

\begin{footnotesize}
\begin{itemize}
\item \textsuperscript{236} Id.
\item \textsuperscript{237} \textit{Acevedo}, 500 U.S. at 579. It is not so evident that Justice Blackmun’s “clear-cut” rule will produce certainty for police and judges and eliminate the supposed confusion caused by the dual track of \textit{Ross} and \textit{Sanders}. As Professor Yale Kamisar remarked shortly after \textit{Acevedo} was decided:
\begin{quote}
If the police only have probable cause to search a specified container in a vehicle, they no longer need a warrant to open that container, but they still cannot search the entire vehicle. Thus the police still have to ascertain which kind of probable cause they have. For resolution of that issue determines the scope of the warrantless search they may make.
\end{quote}
\begin{flushright}
\end{flushright}
\item \textsuperscript{238} See e.g., \textit{Mincey v. Arizona}, 437 U.S. 385, 393 (1978).
\end{itemize}
\end{footnotesize}
“easy for the police to store” and retains sufficient expectations of privacy to warrant a magistrate's finding of probable cause before a search is permitted. Indeed, as Chief Justice Burger instructed, there is nothing unusual about requiring police to obey the requirements of the Warrant Clause before undertaking a search of an object, even though seizure of that same object is permissible without a warrant. These are norms criminal procedure students learn in law school.

The real issue at stake in *Acevedo* is never framed by the Court. That is, “Should the Warrant Clause apply to personal effects?” The result in *Acevedo* is predictable if the focus is on the automobile. Justice Blackmun decries a “curious” dichotomy between “the search of an automobile that

---

239 *Acevedo*, 500 U.S. at 574.
240 *Acevedo*, 500 U.S. at 574.
241 *Chadwick*, 433 U.S. at 13; id. at 15 (explaining that even though issuance of a search warrant was “reasonably predictable, a line must be drawn. ... [W]hen no exigency is shown to support the need for an immediate search, the Warrant Clause places the line at the point where the property to be searched comes under the exclusive dominion of police authority.”); see also *Texas v. Brown*, 460 U.S. 730, 749-50 (1983) (Stevens, J., concurring):

[I]f there is probable cause to believe [a container holds] contraband, the owner's possessory interest in the container must yield to society's interest in making sure that the contraband does not vanish during the time it would take to obtain a warrant. The item may be seized temporarily. It does not follow, however, that the container may be opened on the spot. Once the container is in custody, there is no risk that evidence will be destroyed. Some inconvenience to the officer is entailed by requiring him to obtain a warrant before opening the container, but that alone does not excuse the duty to go before a neutral magistrate.
coincidentally turns up a container and the search of a container that coincidentally turns up in an automobile.”^{242} But this dichotomy is curious only because both containers were found in a vehicle. If the focus is on the container itself, instead of its location, the dichotomy disappears. The answer to the question never asked in Acevedo is that because the Fourth Amendment protects effects as well as persons and homes, and because the Warrant Clause does not distinguish “between searches conducted in private homes and other searches,”^{243} warrantless searches of private containers are per se unreasonable.

C. Promoting Law Enforcement Interests (at the Expense of Fourth Amendment Interests)

Justice Blackmun played an important role in the Court’s narrow vision of motorists’ privacy. In 1974, he introduced (with scant analysis) the norm that motorists have a lesser expectation of privacy in their vehicles in Cardwell v. Lewis, and then applied the same faulty

---

^{242} Acevedo, 500 U.S. at 580.
^{243} Chadwick, 433 U.S. at 8.
reasoning to closed containers seventeen years later in *Acevedo*. In between, the Court decided that a warrantless search, based on probable cause, of a motor *home* found parked in an off-the street lot near a courthouse was reasonable. *California v. Carney*\(^{244}\) explained that the “twofold” reasons for the automobile exception applied to a motor home. First, the motor home is “readily mobile.”\(^{245}\) Second, “the expectation of privacy with respect to one’s [motor home] is

\(^{244}\) 471 U.S. 386 (1985). The vote in *Carney* was 6-3. Chief Justice Burger’s opinion was joined by Justices White, Blackmun, Powell, Rehnquist, and O’Connor. Powell’s vote to join the majority was noteworthy in light of his authorship of *Sanders*. Interestingly, Powell, in a memorandum to himself, noted that he was initially “inclined” to vote for Carney. He noted: “I do not regard the fact that this particular home, found in a parking lot, probably was being driven from place to place. Tens of thousands of people, often seeking employment, move about the country in vehicles used as residences.” No. 83-859, *California v. Carney, Memorandum for the File* (Aug. 15, 1984), *California v. Carney*, Supreme Court Case Files Collection, Box ____ Powell Papers. Lewis F. Powell, Jr. Archives, Washington & Lee University School of Law, Virginia. But Powell changed his mind after the oral argument, in part, based on the Solicitor General’s presentation. See Conference Notes, No. 83-859, *California v. Carney*, Powell Papers.

Equally notable is that Justice White, after joining the majority opinion in *Carney*, six years later, dissented in *Acevedo*. Justice White’s dissent in *Acevedo* simply noted his agreement “with most of Justice Stevens’ [dissenting] opinion and with the result he reaches.” *Acevedo*, 500 U.S. at 585 (White, J., dissenting). Justice Stevens filed a dissent in *Carney* joined by Justices Brennan and Marshall. Professor Seo does not discuss *Carney*.

\(^{245}\) 471 U.S. at 393. The “mobility” justification does not pass the straight-face test. *Chadwick* and *Ross* rejected mobility as a justification for excusing the warrant requirement. *Chadwick*, 433 U.S. at 13; *Ross*, 456 U.S. at 811. As Justice Stevens’ dissent noted: “It is perfectly obvious that the citizen has a much greater expectation of privacy concerning the interior of a mobile home than a piece of luggage such as a footlocker. If ‘inherent mobility’ does not justify warrantless searches of containers, it cannot rationally provide a justification for the search of a person’s dwelling place.” *Carney*, 471 U.S. at 405-06 (Stevens, J., dissenting).
significantly less than that relating to one’s home or office.” This diminished privacy, the Court elaborated, derives “not from the fact that the area to be searched is in plain view, but from the pervasive regulation of vehicles capable of traveling on the public highways.” Really?

In New Jersey, my home state, every car had to pass an inspection to be eligible for a state registration sticker. The inspection included, inter alia, inserting a thin rod in the exhaust pipe to measure engine emissions. (State inspections never involved opening glove compartments, the trunk, or even a visible examination of the passenger compartment of the vehicle.). So, the Court wants the public to believe that because a state official sticks a pollution control device in the exhaust pipe of a home motor, the owner of that vehicle has a reduced expectation of privacy interest in the cupboards, stuffed chairs, bunk beds and the refrigerator of the vehicle against a warrantless police

---

247 Id. at 391.
search?\textsuperscript{248} Nobody believes that.\textsuperscript{249} Instead, what drove the result in \textbf{Carney} was the Court’s desire to promote law enforcement. As Chief Justice Burger admitted, “the overriding societal interests in effective law enforcement justify an immediate search before the vehicle and its occupants become unavailable.”\textsuperscript{250} \textbf{Carney} is another example in a long list of cases where the Justices have proffered the feeble claim that “expectations of privacy are lower in automobiles than in most other places”\textsuperscript{251} in order to make police searches easy.\textsuperscript{252}

\textsuperscript{248} Id. at 393 (asserting that “there is a reduced expectation of privacy stemming from [the motorhome’s] use as a licensed motor vehicle subject to a range of police regulation inapplicable to a fixed dwelling”).

\textsuperscript{249} As Professor LaFave rightly notes, “why the privacy of the living area [of a motor home] is reduced by [regulation and inspection of motor vehicles regarding licensing and safety] is never explained” by \textbf{Carney}. 3 W. LaFave, \textit{supra} note ____ §7.2(b), at 378.

\textsuperscript{250} Id. at 393. The Chief Justice’s apparent concerns about the motor home and its occupants becoming unavailable were groundless because the vehicle was parked “a few blocks from a courthouse in downtown San Diego where dozens of magistrates were available to entertain a warrant application” and there was “no indication of any imminent departure.” 471 U.S. at 404 (footnote omitted).

\textsuperscript{252} There is an aspect of this phenomenon in \textbf{Ross} as well. The essence of \textbf{Ross’} logic boiled down to the following comments: “When a legitimate search is under way.... nice distinctions between . . . glove compartments, upholstered seats, trunks, and wrapped packages, in the case of a vehicle, must give way to the interest in the prompt and efficient completion of the task at hand.” 456 U.S. at 821 (footnote omitted). So too in Wyoming v. Houghton, 526 U.S. at 304-05:

\begin{quote}
Effective law enforcement would be appreciably impaired without the ability to search a passenger’s belongings when there is reason to believe contraband or evidence of criminal wrongdoing is hidden in the car. ... 
\end{quote}
If the Court’s conclusion that motorists have reduced privacy in containers found in vehicles lacks credibility, how should people react when police invoke the automobile exception to search computers, cell phones and other electronic devices? Eventually, the Court will be asked to extend the logic of *Carroll* and its progeny to digital equipment. The lower courts have already seen these cases.\(^{253}\) For example, in *United

---

To require that the investigating officer have positive reason to believe that the passenger and driver were engaged in a common enterprise, or positive reason to believe that the driver had time and occasion to conceal the item in the passenger’s belongings, surreptitiously or with friendly permission, is to impose requirements so seldom met that a “passenger’s property” rule would dramatically reduce the ability to find and seize contraband and evidence of crime.

As Professor LaFave has commented, the “best that can said” about the Court’s refusal to require warrants when police want to search closed containers found in vehicles is that a warrant requirement might result in a “mechanical routine” where judges would issue warrants with little to no “magisterial scrutiny.” On the other hand, requiring warrants “for a comparatively small group of police activities highly intrusive in nature, then the tendency will be to give these warrant requests close examination.” 3 LaFave, *supra*, § 7.2(d), page 737.

States v. Burgess,\textsuperscript{254} police had probable cause to search a motor home for narcotics. They seized a laptop computer and two external hard drives and later conducted a warrantless forensic search which revealed child pornography. Defending the search, the government argued:

1) the expectation of privacy of computer content has been likened to that of a suitcase or briefcase …; 2) the automobile exception to the warrant requirement permits, with probable cause, the search of containers found in the automobile – even locked suitcases and brief cases …; therefore 3) police may (with probable cause, but without a search warrant) search computers and hard drives, found in automobiles.\textsuperscript{255}

Of course, this argument also applies to cell phones found in vehicles.\textsuperscript{256}

The government makes a valid point. Essentially, the automobile exception as interpreted by the modern Court means that if probable cause supports the search, the search is constitutional. Factors that purported to be important in the past, such as the mobility of the vehicle,

\item \textsuperscript{255} 576 F. 3d. at 1088. The Tenth Circuit in Burgess commented that “[n]othing in Acevedo suggests either [a search of a laptop at the scene by simply turning on the computer and examining its contents, or a later forensic search] would be impermissible without a warrant.” Id. at 1091. However, the court chose not to decide the issue because it found that the search of the laptop and hard drives had been authorized by a valid warrant. Id. 1090-92.
\item \textsuperscript{256} See, e.g., State v. Boyd, 992 A.2d 1071 (Conn. 2010); Hawkins v. State, 290 Ga. 785, 723 S. E. 2d 924 (2012).
\end{enumerate}
\end{footnotesize}
the practicality of obtaining a warrant, and the privacy associated with
the area or object searched, are now irrelevant. All that matters is
whether the search was based on probable cause.

Similarly, a straightforward application of *Acevedo* would permit
warrantless searches of electronic devices found within vehicles. In
addition to claiming that the *Ross* dichotomy “failed to protect
privacy,” Justice Blackmun also asserted that pre-*Acevedo* law
“confused courts and police officers and impeded effective law
enforcement.” According to Blackmun, judges and cops were
confused because the dual-track approach of *Ross* was “the antithesis of
a ‘clear and unequivocal’ guideline” and encouraged “the perverse
result of allowing fortuitous circumstances to control the outcome’ of
various searches.” If judges and officers were unable to know when a
d paper bag or suitcase discovered in a vehicle was subject to a
warrantless search, introducing an electronic device into the picture will

not induce certainty for decision makers. And if the Ross dichotomy
“impeded effective law enforcement”\textsuperscript{261} when applied to searches of
paper bags and suitcases, efficient law enforcement will not be promoted
if police cannot search computers and cell phones, which are more likely
to contain evidence related to drug trafficking or terrorism than a brown
paper bag. In sum, whether one focuses on the automobile exception
generally, or the specific logic of Acevedo which provided “one clear-cut
rule to govern automobile searches,”\textsuperscript{262} namely, “police may search an
automobile and the containers within it where they have probable cause
to believe contraband or evidence is contained,”\textsuperscript{263} electronic devices are
covered by the automobile exception.

Though a “mechanical application”\textsuperscript{264} of Acevedo would support
of a warrantless search of a computer or cell phone, I doubt a majority of
the Justices will authorize the search of digital devices under the
automobile exception. In Riley v. California,\textsuperscript{265} the Court addressed

whether police may search a cell phone under the search incident to arrest exception to the warrant requirement. Writing for a unanimous Court, Chief Justice Roberts acknowledged that a “mechanical application” of the Court’s search incident to arrest cases would support a warrantless search of a cell phone. However, the Chief Justice concluded that neither of the historical interests served by the search incident to arrest exception – protecting officer safety and preventing the destruction of evidence – supported searching a cell phone. That is because the data on the phone cannot be used to harm police or assist an escape, and after police secure the phone, the arrestee cannot destroy evidence on the phone.266

After explaining that the traditional interests behind the search incident to arrest exception cannot justify a cell phone search, Chief Justice Roberts acknowledged that searches incident to arrest are also

266 Riley explained that “[d]igital data stored on a cell phone cannot itself be used as a weapon to harm an arresting officer or to effectuate the arrestee’s escape. ... Once an officer has secured a phone and eliminated any potential physical threats, ... data on the phone can endanger no one.” Id. at 387. Regarding the interest in preventing the destruction of evidence, Riley noted that “once law enforcement officers have secured a cell phone, there is no longer any risk that the arrestee himself will be able to delete incriminating data from the phone.” Id. at 388.
permitted due to “an arrestee’s reduced privacy interests upon being taken into custody,”\textsuperscript{267} and that lower courts have applied the Court’s precedents to approve “searches of a variety of personal items carried by an arrestee,” such as wallets, purses and address books.\textsuperscript{268} Following that approach, the Solicitor General in \textit{Riley} argued that “a search of all data stored on a cell phone is ‘materially indistinguishable’ from searches of these sorts of physical items.”\textsuperscript{269} This time, the Court was not buying it: “That is like saying a ride on horseback is materially indistinguishable from a flight to the moon.”\textsuperscript{270} Ultimately, \textit{Riley} found that “[c]ell phones differ in both a quantitative and a qualitative sense from other objects that might be kept on an arrestee's person.”\textsuperscript{271} The vast amount of data and intimate details and information that cell phones can store make them uniquely different for privacy concerns from non-digital containers.

\textsuperscript{271} 573 U.S. at 393.
Riley’s logic and conclusion is relevant when deciding whether the automobile exception authorizes a search of a computer or cell phone. Indeed, Riley and Carpenter v. United States, another opinion authored by Chief Justice Roberts addressing the privacy of electronic data, strongly suggest that “the seismic shifts in digital technology” that allow vast sums of data and personal information to be accessed and

__________________________

273 Carpenter addressed whether the government “conducts a search under the Fourth Amendment when it obtains historical cell phone records that provide a comprehensive account of the user’s past movements.” In a 5-4 ruling, the Court held that a person does have a legitimate expectation of privacy in the record of his physical movements as captured through cell site location information (CSLI). The Court also ruled that the government needs a warrant to access such information.

This is not the forum for a detailed analysis of Carpenter. Essentially, Carpenter creates an exception to the third-party doctrine, which establishes that a person has no legitimate expectation of privacy in information he voluntarily conveys to third parties, even if the information is revealed on the assumption that it will be used only for a limited purpose. While Chief Justice Roberts’ opinion insists that the government sought an extension of the third-party doctrine to access CSLI, what Carpenter does is craft an exception to the Court’s precedents due to the “new phenomenon” and “unique” nature of CSLI and then balances the competing interests. “We decline to extend Smith [v. Maryland, 442 U.S. 735 (1979)] and [United States v. Miller, 425 U.S. 435 (1976)] to cover these novel circumstances. Given the unique nature of cell phone location records, the fact that the information is held by a third party does not by itself overcome the user’s claim to Fourth Amendment protection.” Carpenter, ___ S. Ct. at ___. Two points about this passage are worth highlighting: First, why is CSLI data “unique”? Is it significantly different from credit card data or web browsing data? Second, when the description of CSLI as “unique” is combined with the language which states that “the fact that information is held by a third party does not by itself overcome the user’s claim to Fourth Amendment protection,” id. at ___, (emphasis added), this passage indicates that the Court is balancing competing interests rather than following the bright-line rule of the third-party doctrine. For a comprehensive and critical assessment of Carpenter, see Evan Caminker, Location Tracking and Digital Data: Can Carpenter Build A Stable Privacy Doctrine? 2018 Supreme Court Rev. 411.
274 Carpenter, 585 U.S. at ___.

Electronic copy available at: https://ssrn.com/abstract=3471906
stored by the government has affected how some of the Justices envision Fourth Amendment privacy interests in the twenty-first century. Enormous amounts of personal data that reveal nearly everything about a person can be stored on electronic chips. The Justices know this, and it would be naïve to think that it does not influence their thinking about the Fourth Amendment. And the Justices understand that laptop computers and cell phones “differ in both a quantitative and a qualitative sense from other objects that might be kept on an arrestee's person”\(^{275}\) or found in his vehicle.

As noted above, the automobile exception has evolved into a categorical rule under the modern Court: probable cause to support a search makes the search constitutional. Therefore, when police follow this categorical rule, searching a computer or cell phone found in a car is reasonable. Yet, the pre-\textit{Riley} search incident to arrest norm was also a “categorical rule,”\(^{276}\) just as pre-\textit{Carpenter} third party doctrine law established a categorical rule, namely, when a person discloses

\(^{275}\) \textit{Riley}, 573 U.S. at 393.

\(^{276}\) \textit{Riley}, 573 U.S. at 386 (describing United States v. Robinson as a “categorical rule”).
information to a third party, the revealed information is no longer protected under the Fourth Amendment.\textsuperscript{277} What the Chief Justice wrote in \textit{Carpenter} is pertinent: “[w]hen confronting new concerns wrought by digital technology, this Court has been careful not to uncritically extend existing precedents.”\textsuperscript{278} And the Justices will not extend the automobile exception to authorize the search of cell phones or computers. When the Court is confronted with a search of an electronic device pursuant to the automobile exception, I predict that a majority of the Justices will engage in a balancing analysis, similar to what occurred in \textit{Riley} and \textit{Carpenter}, and will carve out an exception to the automobile exception for certain electronic devices, such as cell phones and computers. The result will not be a “neutral principle,” nor be easily reconciled with \textit{Acevedo}. But life tenure does not require that the Justices be consistent in the rulings they issue.

\textsuperscript{277} \textit{Carpenter,} ___ S. Ct. at ___ (slip op. at 16) (Kennedy, J., dissenting) (“the fact that information was relinquished to a third party was the entire basis for concluding that defendants in [prior precedents] lacked a reasonable expectation of privacy. \textit{Miller} and \textit{Smith} do not establish the kind of category-by-category balancing the Court today prescribes.”); id. at ___ (Gorsuch, J., dissenting) (slip op. at 2) (explaining that pre-\textit{Carpenter} rulings “announced a categorical rule: Once you disclose information to third parties, you forfeit any reasonable expectation of privacy you might have had in it”).

\textsuperscript{278} \textit{Carpenter} (slip op. at 20).
Conclusion

Once the automobile became available to many Americans, it was inevitable police would focus their attention on motorists. “[T]he multitude of traffic laws that everyone disregarded at one point or another gave the police what amounted to a general warrant to stop anyone.”279 As the twentieth century unfolded, enforcing Prohibition and other crime control ventures, like the War on Drugs, provided additional reasons for police to target, stop and search motorists.

Since 1925, the Supreme Court’s resolution of Fourth Amendment cases involving motorists have played a significant role in defining freedom in America. The Court’s rulings have not been welcomed by all. In 1966, a perceptive scholar of the Court’s Fourth Amendment rulings wrote, “cases involving automobile searches … have generated powerful judicial controversy.”280 Thirty years later, another discerning

280 Landynski, supra note ___ at 87.
scholar of the Court, David A. Sklansky, advised that how the Court “handles controversies over vehicle stops – what it says and what it does not say – has a good deal to tell us about its broader understandings of the role of the Fourth Amendment.” Discussing four car stop cases from the 1996 Term, Sklansky noted:

the four cases reveal a strong degree of consensus on the Court about the proper application of the Fourth Amendment, and that the consensus results not from a settled body of doctrine but rather from shared, largely unspoken understandings. These understandings strongly favor law enforcement and, more troublingly, disregard the distinctive grievances and concerns of minority motorists stopped by the police. In ways the vehicle stop cases help to illustrate, this disregard is deeply embedded in the structure of current Fourth Amendment law, and over the long term it limits the protection the Amendment provides to all of us.

On the other hand, law enforcement officers have learned to employ many of the Court’s rulings as a “sword” to investigate motorists.

283 DAVID K. SHIPLER, THE RIGHTS OF THE PEOPLE: HOW OUR SEARCH FOR SAFETY INVADES OUR LIBERTIES 41 (2011) (describing reliance on the reasonable suspicion standard rather than the probable cause standard contained in a memo for a special unit of the Washington, D.C., police department that uses traffic stops to look for guns: “For too long police officers have been trained to view the Constitution of the United States and its judicial interpretations as placing rigid restrictions on what law enforcement personnel can do on the street while
Policing the Open Road expertly studies these controversies and more. Professor Seo’s book is a highly informative study of the Court’s car cases spanning nearly a century. Further, Seo’s insights will very likely help us understand how the Court resolves future controversies. Although technology is changing automobile travel, cars will be with us for the foreseeable future. And where there are cars, there will also be cops, which means motorists will stopped and searched.284 For anyone interested in knowing how the Court’s rulings have shaped and mostly restricted the liberty and privacy of motorists, Policing the Open Road is required reading.

shielding criminals from detection. . . . The members of the . . . Gun Recovery Unit have viewed the Constitution and its associated case law as a law enforcement sword rather than a shield.”). 284 This coming Term, the Court granted certiorari to decide whether, for purposes of an investigative stop under the Fourth Amendment, it is reasonable for an officer to suspect that the registered owner of a vehicle is the one driving the vehicle absent any information to the contrary. Kansas v. Glover (No. 18-556). Last Term, the Court chose not to review an issue that it is likely to see again: whether police are permitted to stop a vehicle in the absence of reasonable suspicion or probable cause that the driver has committed a traffic offense or other crime on the ground that the stop is merely “information seeking.” Sievers v. Nebraska, 911 N.W. 2d 607, opinion modified on rehearing, 920 N.W. 443 (Neb. 2018), cert. den. ____ U.S. ____ 2019), presented this issue.
